    - PAGE 85

New Variations:

1. Tuft-Lite Series New Handle Colors
   - PAGE 19
2. New West Series New Handle Colors
   - PAGE 26
3. Resin T-1 Series New Handle Colors
   - PAGE 28
4. Ultimate Historic: Black Orange Handle
   - PAGE 22
5. American Laminar New Handle Colors
   - PAGE 93
6. 94-47 New Handle Colors
   - PAGE 65
7. 1849 Edition Series New Handle Colors
   - PAGE 88
8. Tactical Hawk: New Handle Colors
   - PAGE 97
9. Police Baton with Roped Handle
   - PAGE 97
10. Lucky Dragon Walking Stick
    - PAGE 102

Notable Improvements:

The following items have been modified this year:
1. Counter Point Series:
   - Page 11
2. Rajah Series:
   - Page 15
3. Training Saber:
   - Improved Lighter Weight
   - Page 99
4. Boomerang:
   - Improved: Now Lighter and Thinner
   - Page 91
5. Chinese Sword Magnetic:
   - Improved: Simulated cord wrapped handle
   - Page 99

Cold Steel Logo
**Performance**

Good looks are important, as much as in Air Force flying suits, clean lines, precise grids and beautiful particulars add all value and satisfaction when you buy a knife. Often, the same beauty of a knife is evident everywhere apparent when the knife is used at Cold Steel®, and believe that all of our knives deliver the perfect blend of materials and workmanship. This is one of our main factors in determining the attributes of a knife: If the knife is a folder, we concentrate on the concentric mechanism to ensure the strongest, safest construction. For hand knives, we strive to develop the perfect mix of materials and workmanship to affirm the most comfortable grip available. Above all, we test what we make. Figure it is not just a matter of getting the level of performance we demand.

**Apocalypse Proof**

In an industry swimming with fad trends and a bewildering number of so-called ‘Martial experts’ it’s hard to imagine a time when all of this was true.

Surprisingly, not too long ago it was considered bad taste to even contemplate discussing the tactical application of a knife. Design was primarily limited to either historical interpretation or artistic value. A few visionary custom knife makers made their own explorations, but all the major knife companies shied away from the controversy of the fighting knife.

Then along came Cold Steel®. We not only boldly discussed the tactical application of the knife, but we began openly testing those theories with graphic and extreme demonstrations of strength and sharpness that shock the industry to its core.

With our unbridled discussions of the combative use of the knife, and by subjecting our knives to grueling and dire torture tests in front of live audiences we were the hard-nosed peace and support of the military, law enforcement and self-defense communities. Our first adopters were warriors, and we take great pride in that. As our company President, Lynn C. Thompson is fond of saying: “We were tactical before tactical was cool.”

We believed in the outset that it used for-orthodox and neglected to develop such sharp and effective tools without focusing on their strength as well. Therefore we continuously invest millions of dollars into not only the design and development of new knives Cold Steel® has led the way in lock design, handle ergonomics and material development and, to this day, we believe you will find no stronger or safer knives on the market.

Now, over 30 years after we first launched the industry with our graphics testing, we remain true to our roots with another installment of our world renowned PROOF series that we have named APOCALYPSE PROOF!

Watch as our own products to the most grueling and horrific torture testing that we could devise, and you will see why you should spend your hard earned money on Cold Steel®.

We hope this video will prove as entertaining as it is informative, but we warn you: This presentation features graphic cutting tests, torturous abuse and extreme testing that may be too graphic for some people and viewer discretion is advised.

**Warranty**

We stand behind our knives and swords 100%. We subject them to the highest standards in the industry and strive to make each one perfect as possible. We warranty that our folding knives, fixed blade knives, and swords are free from defects in workmanship and materials. This warranty does not cover normal wear and tear, re-sharpening of the blade, damage caused by misuse, lack of normal maintenance, or damage. Remember any knife or sword can be found by a suit up to sufficient abuse, so please test use our knives and swords appropriately and remember no knife or sword should be used as a weapon, bat, club, or any other.
The Tri-Ad® Lock

Undoubtedly, Cold Steel makes the safest, strongest folders on the planet. It’s one of many qualities that separates Cold Steel from our competitors.

Our latest improvement is our patented pending Tri-Ad® lock. Andrew Demko, the originator of the Tri-Ad® novel locking mechanism. It’s a successor to a patented lock design originally created by the very talented John PerMar.

The “Stop Pin”...

The cornerstone of the Tri-Ad’s® strength, among other subtle refinements, is the inclusion of a new “stop pin” which re-distributes the load of vertical pressure and negative pressures on the lock. The stop pin receives all positive pressure (pressure on the cutting edge) and transfers it into the liners protecting the handle frame and liners where it can be more effectively absorbed.

Negative pressures on the lock produced, for example, by hyping, digging, piercing or even abusive spine whacks are redistributed because the stop pin receives the forward pressure from the rockers and transfers it into the liners protecting the rocker and its pivot from failing.

Self Adjusting...

Finally, outside of keeping the lock free from the buildup of pocket lint in the mechanism, the Tri-Ad® lock requires very little maintenance. It’s designed to be self adjusting, in the sense that, over time as parts begin to wear, the Tri-Ad® designs will allow it to adapt to the locking bar always wedges deeper in the lock channel between the stop pin and the shoulder of the precision cut tang notch. This feature allows for a very safe, yet secure lock up.

The Tri-Ad® Lock Strength:

The exclusive Tri-Ad® Locking Mechanism is incredibly strong. Here the Code 4 is shown holding 250 lbs. Some of our folders can hold up to 600 lbs!

Relative Pressures

The lock is transferred to the rocker, pushing it forward into the blade tang. The stop pin effectively absorbs most of this force and redirects it into the frame and liners.

Positive Pressure

The stress on the cutting edge is transferred from the stop pin into the handle frame and liners where it can be more effectively absorbed.

The Blade

The blade is shouldered around the stop pin for increased resistance to in and out. The stop pin buffers against, and redistributes the force pressure from the blade.

The full surface of the lock and blade tang make flush together. The slightly angled lock tends to force the lock inwards under pressure instead of outward.

The rocker pin hole is made with extra space on either side to allow for self adjustment.

Extra space is provided to allow the rocker to full compression into the lock in response to normal wear and tear.

American Lawman

Cold Steel is proud to present the American Lawman—named in honor of, and expressly designed to serve, our brothers and sisters in Law Enforcement. These rugged knives are designed to perform in the most extreme environments yet still remain comfortable to use and easy to carry. Their drop point blades are big and sharp enough for almost any task while remaining “Civilian friendly” in appearance. Made from high performance American CTS®XHP™ Alloy steel and finished ground to a full, hand polished edge, each blade is also DLC (Diamond Like) coated for added endurance and corrosion resistance. The Lawman’s handles are also designed to be a versatile and user-friendly as possible. Made from American G-10, and now available in OD Green, and Flat Dark Earth colors in addition to the standard black, they are designed for grip security in even the worst conditions.

Code 4

When developing the Cold Steel Code 4, our aim was to create an ultra-thin, ultra-light, highly functional utility knife that is a breeze to carry.

There is great comfort to be gleaned from knowing you are carrying a good knife, and many of our friends in Law Enforcement talk about how they’re always looking for that one reliable, lightweight blade that can become a permanent part of their everyday load out. We believe that our Code 4 is destined to become that knife!

It won’t weigh down your uniform or impede your extra roomy back. So it’s always there when you need it.

Available in a variety of blade configurations, with anodized pocket clips and thumbs slots, each Code 4 features sturdy, hard wood grain metal gray 6061 Aluminum handles, our world-renowned Tri-Ad® locking mechanisms, and high value polished, razor sharp USA CTS®XHP™ blades.

AK-47

The Cold Steel AK-47 has been exceptionally popular with Military personnel and Law Enforcement professionals, and with good reason; it features a solid 6061 Aluminum pommel and an American CTS®XHP™ Alloy Steel blade, vacuum heat treated and sub-zero quenched for maximum toughness, and honed ground for an edge that has to be felt to be believed!

The AK-47 blade is also DLC (Diamond Like) coated for superior corrosion and abrasion resistance. Each knife has a high quality American G-10 handle, that’s available in new OD Green, and Flat Dark Earth colors in addition to the standard black. It offers incredible security grip even when we’re thick gloves or working in cold or wet conditions, and is equipped with our Tri-Ad® lock.

The Tri-Ad® is arguably the world’s strongest locking mechanisms. With a rock solid lock-up and extreme shock resistance—two features of particular concern to our modern Militaries, who require dependable tools for the worst possible situations!

Finally, to assure fully ambidextrous and last deployment, each AK-47 features our patented thumb plate, allowing the knife to be drawn and simultaneously opened by snapping it on the edge of a pocket.

The Recon 1 series continues to set the standard for tactical folding knives. These dependable knives have earned a hard-earned reputation for reliability and strength. The Recon 1 series is available with Od Green and Flat Dark Earth colored handles:

4 Inch

Lacelet: 5.3 oz.
Handle: OD Green
Blade: 4”
Thick: 3.5mm
Weight: 5.3 oz.

The SR1's heavy-duty blade is made to put to work. Crafted from American CPM-S35VN premium powdered steel, it's a heavy-duty workhorse designed for the harshest and most arduous environments.

A good blade needs a good handle, so the SR1's handle is made from premium American G-10 with heat treated nested steel liners. With an integrated lanyard hole and coarse-textured surface for a secure grip even in cold, wet conditions, and expertly contoured to allow for a comfortable and safe grip even while wearing heavy layers.

For added reliability and peace of mind, we equipped the SR1 with our world-famous Tri-Ad® locking mechanism - proven time and time again to weather even the worst abuse, with unparalleled shock and impact resistance - making this knife the ideal choice for a survival rescue blade intended for our nation's warrior elite!

27TLCNV 27TLCNS

The SR1 is a popular knife for law enforcement - he has shared his knowledge and experience with some of our nation’s most honored and respected tactical experts, and the most common question that they ask, time and time again is “Mr. Thompson, what knife do YOU carry?”

As the designer of many of our most memorable blades, and the lead designer of our in-house R&D department, Lynn often switches out between different knives. But one blade has remained a constant favorite of his ever since its initial development over 20 years ago – the Vaquero!

With its long, wide undulating blade shape, the Thompson Vaquero with its Vaquero-style blade has the broad belly and sweeping curve of a dagger, but also the prominent piercing tip of a dagger. Fully contoured, with our signature “grip n rip” serration pattern for shearing through tough, fibrous material, the Vaquero is not only a great choice when working with thick rope or abrasive mediums, but a devastatingly effective self-defense tool.

This signature edition Thompson Voyager is strictly limited to 2000 pieces. Each one is numbered, with a laser-engraved signature on the blade and a unique box hand signed by Lynn himself.

Featuring our pioneering Tri-Ad® lock for added strength, an expertly heat treated American CPM-S35VN powdered steel blade, chosen for its ability to take and hold an incredibly fine edge, and a G10 (Diamond Like) coating for superior scratch resistance, the signature edition Thompson Voyager is sure to be a proud addition to your collection!
**G-10 Ti-Lite**

Often imitated, but never equaled, the Ti-Lite (designed by the late, great Phil Boguszewski) is a masterpiece of performance and style. Now, one of our most popular and enduring tactical folders is available with some of the highest quality American made materials on the market!

This new Premium format Ti-Lite® features an American CTS-XHP powdered steel blade for superior edge holding potential and a rich black DLC (Diamond Like) coating for new levels of durability and scratch resistance.

The eye-catching curved quillions add to its sleek, comfortable design, while also facilitating a lightning fast draw. Simply snap one on the corner of your pocket as you draw the knife, and the Ti-Lite® super sharp blade can be brought into play in the blink of an eye!

Each G-10 handle is painstakingly 3D CNC machined to its rebellious switchblade-like design, and milled at great expense, providing an incredibly strong and shock resistant.

The Counter Point's handle is made from Griv-Ex™ and reinforced with heat treated aluminum liners, making it not only very strong, but comfortable and secure in almost any grip imaginable. For added strength and safety, we equipped the Counter Point with our famous Tri-Ad® locking mechanism, proven again and again to be incredibly strong and shock resistant.

**Counter Point Series**

We spent years exploring high-end stainless, and now we’ve applied that knowledge to a folding Knife – the Cold Steel Counter Point. The Counter Point is available in three blade sizes: 3”, 3.5”, and 4”. The stiletto-inspired spear point blades have a classic drop point and a custom ground edge, a combination that makes a blade that not only looks great, but delivers a show stopping performance!

The Counter Point is highly corrosion and stain resistant and takes a very sharp and durable edge. The Counter Point’s handle is made from Griv-Ex™ and reinforced with heat treated aluminum liners, making it not only very strong, but comfortable and secure in almost any grip imaginable. For added strength and safety, we equipped the Counter Point with our famous Tri-Ad® locking mechanism, proven again and again to be incredibly strong and shock resistant.

**Frenzy**

Designed by award-winning custom knife maker Andrew Demko, the Cold Steel Frenzy takes its inspiration from ancient Japanese Kabutowari – with a thick spine, slender blade, needle-sharp piercing point and a long flat cutting edge. Made from premium American CTS-XHP powdered steel for superior edge retention, and line-grain satin polished with a deep fuller, the Frenzy’s 5.5” blade is as visually appealing as it is effective, and as it catches the light it’s truly a wonder to behold!

The Frenzy’s handle is made from multiple layered and 50/50 Griv-Ex/Machined dual tone American G-10™, and flat enough to comfortably carry without “printing” while it’s expertly designed and ergonomically contoured shape provides both comfort and retention in any grip.

Equipped with the ground breaking Tri-Ad® locking mechanism for supreme endurance, reliability and safety, the Frenzy is a sleek and stylish merge of utility that takes up very little space in your pocket but can open rapidly by using the thumb studs or by snagging a quillon on the edge of your pocket as you draw your knife out.

**Open Handle Texture**

**New Handle Texture**

**OLD HANDLE TEXTURE**

**NEW HANDLE TEXTURE**

**New Premium Format Ti-Lite®**

Our 62PV2™ Ti-Lite® mimics the look of their more expensive counterparts almost exactly – but instead of 7075 Aluminum, we use 43% glass filled Zy-Ex™ for the handles, and Japanese AUS-8A instead of American H1 for the blades.

The resulting knife is extraordinarily lightweight, while remaining remarkably strong, sharp and good looking – at a price almost everyone can afford!

Immortal

Designed by custom knife maker Mike Wallace, the Immortal is quite simply a cutting machine! Its extra-long blade is fully flat ground, with a continuous curve that facilitates amazing shearing cuts! Modeled to pack as much cutting performance® into a 4" blade limit as possible, the Immortal was inspired by one simple design philosophy—when it comes to cutting, if you can’t go long—go wide! Made from premium American CTS® XHP steel, the beast of a blade is perfect for everyday utility use and cutting chores. Jutting through rough material like a hot knife through butter! The 30 O.K. machined Inset handle, and stippled non-slip American G-10 handle is not only incredibly comfortable both in the hand and in the pocket, but it also ensures what is arguably the strongest lock in the industry! The Cold Steel Tri-Ad® has proven itself time and time again as an unbelievably strong and safe locking mechanism—a perfect choice for a knife with this much cutting potential! Available with either a rich satin polish or deep black DLC (diamond like) coating, the Immortal is sure to become your favorite knife for everyday cutting tasks.

The Cold Steel Golden Eye is a new addition to our latest range of performance DLC (everyday carry) blades. Designed by award-winning custom knife maker Andrew Demko, this eye-catching new pocket knife is thin and light enough for carry all day with comfort and ease, with the elegant good looks you want from a high-end production folder.

**Golden Eye Elite**

The Golden Eye’s hand-forged razor sharp blades are available with either the iconic Cold Steel American Tanto point or Andrew Demko’s signature modified Drop point. Both are fine-grind two-tone satin polished — a custom and time consuming process usually seen on expensive custom knives — making them extremely good line items equally sharp as the blade catches the light. The conventional blade base™ thumb ramp allows for smooth and easy ambidextrous deployment, while adding another element of visual appeal to an already eye-catching blade. The Golden Eye’s ergonomic medium traction American G-10 handle scale gives an extremely secure and comfortable grip, while the rich black grip beautifully complements the steel and brass collet of the blade.

An extra-long, slimline clip clip (with integrated lanyard hole) allows for comfortable and discreet ambidextrous tip-up carry, while keeping the Golden Eye safely secure in your pocket.

Lastly, we have equipped the Golden Eye with our Tri-Ad® locking mechanism, granting unparalleled security, safety and reliability.

**Golden Eye**

Featuring the same high quality blade steel as the Golden Eye, with the same rich dual-tone line grain finish and contrasting brass HTR™ thumb ramp, but replacing the American G-10 handle with costly carbon fiber scales. Carbon fiber, with its excellent strength-to-weight ratio, provides a perfect balance between good looks, comfort and class, with impressive durability and all-round toughness.

The Golden Eye is an everyday carry blade that’s the perfect choice for when you are wearing a suit or slacks. A great knife for church, a wedding, a date, or just any time you want to add that extra level of flash and elegance to your gear without sacrificing performance or reliability.

**Tiger Claw**

Created by custom knife maker Andrew Demko, the Cold Steel Tiger Claw is a folder versatility with design innovations. The blade was designed following Andrew Demko’s extensive testing as a Journeyman Electrician and Engineer. When developing his own hand made knives he made a Ka-Bar type Hawkbill hybrid blade that could cut rope, cable, wire and anything else his vacation threw in his path. This knife served him well throughout years of hard use, and, when tasked by Cold Steel to develop his own take on a folding Karambit, the blade shape immediately came to mind. Replicating Andrew’s original blade design in premium American CTS XHP steel, the Tiger Claw offers the tactical performance of the Filipino and Indonesian fighting Karambits, coupled with the utility and functionality of a working man’s Hawkbill. With the Demko thumb-plate, the Tiger Claw offers a fully ambidextrous fast draw from the pocket either in a saber grip or a traditional blade-down Ka-Bar grip, deploying the blade with lightning fast ease! Made with his signature minimalist style, Demko’s Tiger Claw features a slim DLC machined US G-10 handle, a black aluminum pocket clip, and our exclusive for-Ad™ locking system.

**Swift Series**

The Cold Steel Swift is a sleek, fast and speed locking assisted-opening folder designed by custom knife maker Andrew Demko. Featuring cutting-edge Flash-Tek technology, the Swift has that satisfying speed and smoothness of an assisted opening knife, but with the strength you have come to expect from Cold Steel and from Andrew Demko.

Available either two-tone satin polished or black DLC coated, the Swift’s beautiful blade is manufactured from American CTS XHP Alloy and honed to a knife cutting edge. The modified spear point has a distinctive curved spine which not only reduces the knife’s profile when closed but creates a comfortable and functional spine for your finger or thumb for detail and precision work. The Swift also features a re-designed knife’s profile when closed but creates a comfortable and functional spine for your finger or thumb for detail and precision work.

**Black Talon II**

The original Cold Steel Black Talon was a handsdown, favorite folder. Featuring a modified curved tanto blade made from Japanese San Mul 8™ steel. It had a sleek titanium frame with 6061-T6 alloy and — for its time — a very strong locking feature for even greater levels of strength when open! Our “XS” (Xtra Safe) safety keeps the blade securely locked when closed, while also acting as a secondary locking feature for even greater levels of strength when open!

This incredibly comfortable, lightweight and fast-action folder is sure to become a much loved everyday carry choice!

**Our “XS” (Xtra Safe) Safety keeps the blade securely locked when closed, while also acting as a secondary locking feature for even greater levels of strength when open!**

**Lucky Series**

The Cold Steel Lucky is our modern re-invention of the classic Gentleman's pen knife. Astonishingly lightweight, it barely moves the scale at a little over one ounce, making it utterly effortless to carry. On the removable pocket clip you have the worm pasty or lightweight summer slides, carry it in a shirt pocket or even one in a tie clip. A size in thin and light as you forget you even have a knife – but it’s always there when you need it! The Lucky's twin blades (one plain edge, one serrated) are made from premium CPM S35VN steel, securely nestled between two-tone polished carbon fiber scales – and with an 88 of 60-41, the Lucky takes a razor edge that will last! Stylish, unobtrusive, elegant and legal almost everywhere in the world, it’s a versatile knife that will serve you well, and look beautiful while doing it!

**Lucky One**

Our single-bladed Lucky is even lighter and more discreet to carry. Featuring a single razor-sharp plain-edge CPM S35VN steel blade and feather-light polished carbon fiber scales, this classy pen knife is simply a breeze to carry and wear all day long.

**Charm**

There is a great deal of truth to the saying “the best knife is the one that you have with you” and while here at Cold Steel we generally advocate “bigger is better” when it comes to blades, there’s no denying the usefulness of a small knife that you can take with you virtually everywhere.

The Cold Steel Charm takes compact knives to a whole new level. This diminutive slip-joint folding knife has an overall length of only 2 7/8” when open, and it weighs barely 0.6 oz! – yet, thanks to its high performance high-strength AUS 8A Steel, the Charm is a handy sharp little tool that is always there when you need it. The Charm’s single blade, 1 1/4” long, is made from treated cryo-quenched Japanese AUS 8A steel, and it’s equipped with the HTR™- an innovative new thumb opening feature designed by Andrew Demko - to allow for a secure and positive grip on the blade for ambidextrous deployment, adding to this tough little knife’s practicality and functionality.

The contrasting colors of the Knurled-gear slim-grind polished American Tanto blade contrast beautifully with its rich blue G-10 handle scales and bead blasted pocket clip, adding good looks and a touch of style to this practical utility knife and tool.

Easy to carry, easy to slide, and easy on the wallet, the Khan is a knife you’ll be proud to carry in your pocket every single day!

**Pro-Lite Series**

The Cold Steel Pro-Lite was developed with one clear aim. To offer a folding knife with all the strength and durability that our fans and customers have come to expect from Cold Steel products, but at an even more affordable price! Designed in celebration of custom-knife maker Andrew Demko, the Pro-Lite features a high stiffness, premium CPM S35VN steel blade (with Clip Point, Spear Point or Tanto Point configurations) that will take a very sharp edge, while still being incredibly easy to re-sharpen in the field. It also features a tough matte G-10 polymer handle with integrated large pocket clip and reversible ambidextrous pocket clip for left or right handed users. Equipped with our ground breaking Tri-Ad® locking mechanism for added safety and strength, the Pro-Lite has withstood all the grueling and tenuous quality control tests that Cold Steel is famous for! If you are looking for a tough, high performance folding knife that won’t break the bank – your search is over!

**Colored Handles:**
- Blue
- Red
- OD Green
- Flat Dark Earth

**Tuff-Lite Series**

Tough enough to do the job and light enough to be handy, Cold Steel’s Tuff-Lite folder is there when you need it. It’s perfectly sized to slip into a pocket, clip to your watch band, or wear around your neck on a lanyard. With a wide, hollow ground 2 1/2 inch blade, it’s surprisingly sharp and can sheen through the thickest of materials with ungrudging ease. And, due to its sharp point, it offers deep penetration and precision cutting potential without appearing aggressive enough to draw unwanted attention. It is bred for work and offers a surprisingly good grip due to its super-duty engineered G10-Lite™ handle that offers an enormous, strong grip to weight ratio and features our state of the art Tri-Ad™ lock, which grants it astonishing muscle for its size.
A design collaboration between custom knife-maker Andrew Demko and Cold Steel President Lynn C. Thompson, the Cold Steel Finn Wolf is a folding utility and camp knife that draws inspiration from the classic Finnish Pukko. Equipped with our Tri-Ad® lock for superior safety and security, the Finn Wolf is a folder you can rely on in even the most uncompromising conditions. Its satin polished Japanese AUS 8A blade is ready to put in long hours and hard work, and with its keen zero ground edge it’s a breeze to re-sharpen in the field. With this much performance packed into this comfortable, strong, practical and inexpensive a package, there’s simply no excuse not to add a Finn Wolf to your collection today!

Created by custom knife maker Andrew Demko, the Cold Steel Grik is a pocket-friendly, functional utility and everyday carry knife. The Grik’s distinctive modified spear point blade is made from expertly heat treated and cryo-quenched Japanese AUS 8A steel for a perfect balance between edge holding and ease of re-sharpening. A shallow indent in the spine of the blade makes a comfortable thumb stop for leverage when doing hard work, or a rest for your index finger when using the tip for precision cutting. The Grik’s two tone line-grain satin polished blade and contrasting black polymer HTR™ thumb ramp make the knife really “pop” – making it as easy on the eye as it is to use. But it’s the Grik’s handle that sets it apart! Made from ergonomically contoured GFN with a replaceable and reversible clip, it’s an extremely thin and flat low-profile carry that’s easy on your pockets and incredibly discreet. Furthermore, the Grik’s polymer clip is incredibly comfortable in-hand, negating those “hot spots” that often occur when using a steel-clipped folder for any prolonged length of time. Plus, unlike a steel clip it won’t scratch your paint work or tear the leather seats in your car!

The Voyager’s ergonomic Griv-Ex™ handles (reinforced with heat treated 6061 aluminum liners) provide both great comfort and a secure grip even under extended use in tough conditions. Available in two sizes and with numerous blade and edge configurations, there’s a Voyager for everyone!

The Cold Steel Voyager® series is designed to be the true “everyman” knife. Lightweight, comfortable, super sharp, they are rugged, dependable and perfect for hunting and camping as well as general utility and daily cutting chores. The Voyagers excel in many survival and rescue applications, and they have proven to be very popular with Police and Military personnel, who appreciate the combination of cutting performance and safety that they offer. Each knife in our extensive Voyager™ line is precision engineered and tested to our most exacting standards. Featuring American made Carpenter CTS BD1 Alloy Blades, and our Tri-Ad® locking mechanism – which is quite possibly the most secure, safe and shock resistant lock on the market today! The Voyager’s magnesium Griv-Ex™ handles are high-quality injection-molded with heat treated 6061 aluminum liners to provide both great comfort and a secure grip even under extended use in tough conditions. Available in two sizes and with various blade and edge configurations, there’s a Voyager for everyone!
Steve Austin is one of the most recognizable wrestlers in the world. His bombastic outspoken character and on-screen charisma has made him more than just a celebrity, but a part of American popular culture! Behind his larger than life persona, Steve is an avid outdoorsman and hunter, and a lover of MMA and Martial Arts. His podcast – The Steve Austin Show – has reached a huge audience, with celebrity interviews from the world of MMA, Pro Wrestling, Movies and more. Steve regularly discusses his love of blades, and as a collector (and user) of edged tools he has amassed a wealth of knowledge and practical experience. On his famous “Broken Skull” Ranch, he has put a multitude of knives through their paces, and over the years he has learned to truly appreciate a tough, hard-working knife that won’t let you down. We’re honored to be the knife brand of choice for Steve Austin, and to develop the quality, hard working tools that bear his name!

**Steve Austin’s Broken Skull Series**

Named after Steve Austin’s famous “Broken Skull” Ranch, these awesome pocket knives have been developed to reflect Steve’s personal taste in every day carry blades. Available in 6 color configurations, the Broken Skull features a super sharp, wide, flat-ground clip-point blade that makes daily cutting chores and even skinning game a breeze! Black DLC (diamond like) coated for superior scratch resistance, the Broken Skull’s blade is hair popping sharp straight out of the box – and because it’s made from high performance American CTS®XHP powdered steel it will keep that screaming edge for a long time!

The Broken Skull’s handle scales are made from premium American G-10 and contoured for a superb grip while still being thin, light and smooth enough to make it effortless to carry these knives all day long. At a featherweight 3.1 oz the Broken Skull is a knife you’ll always be happy to carry. Never weighing you down or filling your pockets with added bulk, but always there when you need it!

**Steve Austin’s Working Man™**

As a ranch owner and outdoorsman, Steve Austin is a proud proponent of the carry and use of a good working knife. For him, a blade is a tool first and foremost, and whether he’s working on his famous Broken Skull Ranch in Texas or on a movie set in Hollywood, he’s always got the guy with the knife! From the tip of its cryo-quenched German 4116 steel drop point blade to the butt of its tough G10 polymer handle, the Working Man™ is designed to offer high performance at an affordable price. Available in 3 colors, each Working Man™ is equipped with our revolutionary Tri-Ad® locking mechanism, offering unparalleled strength, safety and shock resistance. The Working Man™ also features a wide lanyard hole and fully ambidextrous reversible pocket clip making it a breeze to carry and use in the field. If you have been looking for an everyday carry knife that isn’t afraid to put in hard work – your search is over!
STEVEN SEAGAL

STEVEN SEAGAL is a Martial Artist who needs no introduction. He found international acclaim for his high-octane Action Movies, but his first and foremost love is the world of Martial Arts. With an encyclopedic knowledge of the Japanese warrior arts, a wealth of experience with the Katana, a 7th Dan Black Belt in the art of Aikido and a lifetime of training, he is still a much-in-demand instructor and consultant. Whether working special techniques with World Martial Artists or travelling the world teaching seminars, there is no doubt that Steven is still a force to be reckoned with!

SEAGAL SIGNATURE WAKIZASHI

This unusual blade is almost an exact reproduction of an extremely rare antique original from the collection of Mr. Steven Seagal.

- Overall: 22 1/2"
- Blade: 33" thick: 8MM
- Weight: 48.4 oz.

SEAGAL SIGNATURE KATANA

This Japanese sword is inspired by an antique original from the collection of Mr. Steven Seagal.

- Overall: 37"
- Blade: 37" thick: 8.5MM
- Weight: 73.2 oz.

SWORD BREAKER

Historically, the “Helmet Breaker” was an incredibly capable off-hand parrying tool precision weapon used by Japanese Warriors. It was used to block, trap and parry a sword at long range and to manipulate, hook and stab at an opponent in stabbing / grappling range. Refined to be capable of of great open armor like an oversized can opener, there’s no doubt it was more than capable of denting helmets and damaging armor with ease. Its point pierced armor targets, while the thick spine parried, deflected and turned even the heaviest of swords. The Helmet Breaker’s stoutly fashioned “hilt” was worn as a guard to protect the hand, while also momentarily trapping and binding an opponent’s blade. While testing this devastating weapon, Steven playfully nicknamed it the “Helmet Bender” because of its incredible helmet crushing power. Practically reproduced from an antique original in Mr. Seagal’s collection, every inch of this unusual weapon is made to the highest standards, from the polished blade to the handle painted and distressed scabbard (which replicates Steven’s battle worn antique original).

- Overall: 44"
- Head: 4 1/2"
- Weight: 34.1 oz.

STEVEN SEAGAL HELMET BREAKER

STEVEN SEAGAL TEN SHIN

While together on a research trip, Steven Seagal showed our company President one of the prized pieces in his collection - an oversized custom walking stick of his own design called the “Ten Shin”. The work of art was custom made of the finest exotic hardwood, but over the years it had weathered. Lynn immediately saw the potential in making a modern polymer replica of this unique design. One that wouldn’t jut, crack or snap. As a Martial Artist, Steven has spent decades using sticks, so when it came to designing a walking stick, he incorporated elements of bokken design into a unique “creek” topped stick. Lynn said “As soon as I saw that stick, I immediately ‘got it’! Steven had addressed so many of the issues associated with stick top designs, and added in so many elements that become immediately apparent to any student of the fighting arts! It’s a functional creek stick, but it’s also an amazing tool for the modern Martial Artist. Whatever style you study, from walking stick defense, Japanese sword arts, stick fighting, tomahawk fighting, and even bayonet training, you can design yours in every way!”

As Steven is a very tall individual, the Ten Shin is the largest offering in our walking stick series. Featuring the symbol for “Two Sticks” literally “H BETWEEN” or “Walking the Sacred Way”, a plethora of personal significance to Steven, and in his honor, title passed down to him from one of his closest instructors, this is an unusual walking stick imbued with true warrior spirit.

- Overall: 37"
- Head: 4 1/2"
- Weight: 34.1 oz.

The Helmet Breaker’s stoutly fashioned “hilt” was worn as a guard to protect the hand, while also momentarily trapping and binding an opponent’s blade.

- Overall: 37"
- Blade: 37" thick: 12.7MM
- Weight: 27 oz.

The Helmet Breaker’s dense protective body is a one-use attack weapon used to block, trap and parry an opponent’s blade.

- Overall: 37"
- Blade: 37" thick: 12.7MM
- Weight: 27 oz.
**The Cold Steel Jade Lion**

Gim has proven to be incredibly popular with Chinese Martial Artists and blade collectors alike. Hand forged and expertly tempered from high-quality Damascus steel, its subtly patterned blade is as sharp as it is beautiful.

The Jade Lion Gim is a civilian self-defense Wen Jian (Scholar’s Sword), with a little more panache than the practical versions (like our own Gim Sword) that were made for the battlefield. In our tests it severed and pierced 4” bamboo poles with a single cut or thrust.

The heavy guard and pommel are cast from nickel-silver and adorned with watchful Chinese lions. Providing exquisite contrast to the jade green cord and Samé wrapped handle and Samé skin wrapped rosewood scabbards.

Since their initial introduction, Cold Steel’s Emperor Series swords have proven to be popular with many of our customers. Still, we are aware that there are some people who want a battle ready sword but hope to find one at a more affordable price.

Our Warrior Series addresses this problem directly. The Warrior Series swords share the same high-performance 1060 carbon steel, heat treatment, and sharpness as their Emperor counterparts, but we have omitted their expensive mirror polishing in favor of a more practical finish. This makes the Warrior Series a perfect choice for training and perfecting cutting techniques (Tameshigiri) without damaging or tarnishing the blade.

**Gim Sword**

There are few swords in the world that are more effective than the two-handed Cold Steel Chinese War Sword. Over the years we have tested this sword time and time again, and we’ve consistently cut tougher and more challenging targets. It remains one of the most popular swords in our line up, and when you see the tests, it’s easy to see why!

The Chinese War Sword’s hand wrapped grip, 5” shaped guard, and steel ring shaped pommel all work in concert to make it a well-balanced sword that’s unbelievably fast and agile despite its formidable size. Each sword is hand sharpened and is protected by an attractive heavy leather scabbard.

**Chinese War Sword**

The Cold Steel Jade Lion Gim has proven to be incredibly popular with Chinese Martial Artists and blade collectors alike. Hand forged and expertly tempered from high-quality Damascus steel, its subtly patterned blade is as sharp as it is beautiful.

The Jade Lion Gim is a civilian self-defense Wen Jian (Scholar’s Sword), with a little more panache than the practical versions (like our own Gim Sword) that were made for the battlefield. In our tests it severed and pierced 4” bamboo poles with a single cut or thrust.

The heavy guard and pommel are cast from nickel-silver and adorned with watchful Chinese lions. Providing exquisite contrast to the jade green cord and Samé wrapped handle and Samé skin wrapped rosewood scabbards.

**Warrior Series**

Since their initial introduction, Cold Steel’s Emperor Series swords have proven to be popular with many of our customers. Still, we are aware that there are some people who want a battle ready sword but hope to find one at a more affordable price.

Our Warrior Series addresses this problem directly. The Warrior Series swords share the same high-performance 1060 carbon steel, heat treatment, and sharpness as their Emperor counterparts, but we have omitted their expensive mirror polishing in favor of a more practical finish. This makes the Warrior Series a perfect choice for training and perfecting cutting techniques (Tameshigiri) without damaging or tarnishing the blade.

**Butterfly Swords**

Still immensely popular with Martial Artists and collectors alike, these iconic Chinese Butterfly Swords are carried in pairs that are cleverly nested together so they appear to be one sword in the sheath. But when they are drawn, they can be separated and wielded in both hands with lightning speed!

Our interpretation of these classical blades are 15” long and 2 5/8” wide. Their pronounced “D” shaped guards have a long forward quillon for deflecting and trapping opposing weapons. The Butterfly’s handsome hardwood handles are covered with braided silk cord to provide a secure and comfortable grip. The perfect gift for Chinese Martial Arts practitioners, and a fine addition to any blade-lover’s collection!
The Crane is a symbol of luck and longevity, loyalty and strength, and is a much-loved symbol in Japan. As we developed a new Katana to add to our long standing and world-renowned line-up of Japanese blades, we felt it only fitting to add the Crane as a motif. The Mizutori (Crane) Katana is a high-end, high-performance blade that was inspired by older, practical battlefield Katanas. Measuring a hair under thirty inches, the Mizutori’s blade is made from high quality Damascus steel and differentially hardened with a clay tempered Hamon. The handsome blade features a hand sharpened Hamaguri grind with highly polished spine and blade flats. The Tsuba and Menuki both feature an iconic crane motif, and the high quality ray-skin handle is tightly wrapped in brown silk cord, adding a level of detail and beauty that must be seen to be believed. Housed inside a lustrous black lacquered Saya, the Mizutori Katana a stunning and attractive sword that is sure to become the pride of your collection!

The Mizutori (Crane) Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It’s equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Mizutori Katana, or a beautiful stand-alone blade. The Cold Steel Gold Lion Katana represents a Samurai’s “every day carry sword” for personal protection, and the defense of his Lord, his family and his home. Significantly lighter than some of our other heavier-duty Katanas, it is not only faster in-hand, but easier and more comfortable to carry when tucked into an Obi and worn all day. The Katana’s Menuki bears the symbol of the Japanese Shisa (Lion Dog) a guardian or protector - a fitting motif for this beautiful lightweight sword. Measuring just under thirty inches, the Gold Lion Katana’s blade is made from expertly hand honed and highly polished Damascus steel, with an Habaguri grind, peaked Lori Mune spine and undulating clay-tempered Hamon. The black iron Tsuba, Fuchi and Kashira all have gleaming 24 carat gold leaf accents and the handle features white ray-skin and a black silk cord wrap. The Gold Lion Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It’s equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Gold Lion Katana, or a beautiful stand-alone blade in its own right.
Many Japanese swords offered today are interpretive copies of antiquities, from feudal Japan, and they were made for warriors of small stature who seldom rose above five and a half feet. As beautiful and skilfully designed as these swords are, they may be perfectly suited for the modern warrior, who has grown to be a substantially taller and stronger version of his historical counterpart! With that in mind, Cold Steel has created the Dragonfly Series—a line of Japanese swords featuring thicker, wider and heavier blades.

These beautiful swords have a distinctive teal-green silk cord-wrap and black same (ray skin) handles, complementing rich iron furniture with a dragonfly motif. Their deeply curved and hand polished 1060 steel blades terminate in a long “iris leaf” point for maximum cutting potential. Additionally, these swords come with two protective bags—a blue cotton travel bag and an intricately decorative display bag made from fine heavy silk brocade.

The latest addition to our line-up of high-performance swords is inspired by examples of early 17th Century Polish Sabers. Used both on horseback and on foot, these battlefied sabers had a fearsome reputation, not least for the skill-at-arms of the Polish Noblemen who wielded them, but also for their phenomenal cutting potential.

Our interpretation of this historically significant blade was designed by custom bladesmith Dave Baker, and is made from expertly heat treated Carbon Steel. With a fully sharpened, distal tapered and strongly curved blade, the Polish Saber is capable of delivering exceptional cuts, while still remaining stiff enough for the thrust.

Equipped with a solid steel, brass inlaid guard and knuckle bow for hand protection and a functional thumb ring to facilitate the moulinet—allowing the wielder to keep the blade in continuous motion, parrying, cutting and changing direction at great speed! With its eye-catching leather wire wrapped hilt, and matching leather scabbard and brass inlays left blank for personal engraving, this sword is as good looking as it is functional, and it’s sure to be the pride of any European Martial Artist or blade enthusiast’s collection.

Cold Steel’s German Longsword is a high-end, high performance sword for serious users and collectors. A modern reinterpretation taking its inspiration from historical examples, it has an expertly heat treated and spring tempered 1060 steel blade that is expertly balanced, beautifully polished and hand-honed to a keen edge.

A large S-guard and protective side ring offer significant hand protection while being capable of performing the binding, trapping, and winding techniques that made the German Sword Masters art so effective! A wrapped leather grip terminates in a heavy steel pommel that not only counter balances the long blade but serves as a potent weapon in its own right. The twisting spiral design on the pommel is more than just a good looking decorative feature; it also provides a comfortable and secure grip even in gloved or gauntleted hands.

Finally, the German Longsword is enclosed in a thick ridged, hand-stitched leather scabbard with an antiqued steel chape and brass buckled leather straps for wearing your sword on a belt or baldric.

The German Grosse Messer (“big knife”) is one of the largest of the blades that fall under the classification of “Messer.” It can be wielded in one or both hands and is capable of astonishing cutting feats. Cold Steel’s modern version of this historical classic features a hand-forged blade of 1060 carbon steel that’s so sharp we’ve used it to split a telephone book in half, with a single blow! The guard and pommel are made from blued steel and feature ornamental handle scales strongly riveted to the sword’s full tang. The Grosse Messer also comes with a handsome wood and leather scabbard, reinforced with a steel chape and throat that has been blued to match the guard and pommel.
**Viking Sword**

The historic Viking sword of the 9th & 10th centuries featured a long wide blade with a broad central fuller and two keen edges. A single guard with four armed curving quillons was often utilized and combined with a utilitarian wooden handle and a heavy 5 lobed pommel to balance the long blade.

Cold Steel's interpretation of this sword features a double-edged blade that is hand forged out of Carbon steel and hand polished and sharpened to perfection. The wooden handle is covered in leather and is supported by a simple, elegant guard at one end and a flared pommel at the other.

The Viking Sword is supplied with a leather wrapped woode scabbard that is reinforced with a polished steel chape and throat.

**Two Handed Great Sword**

Our two-handed Great Sword is one of the biggest swords we make. But don't let its size fool you! There is nothing awkward or clumsy about this awesome sword.

Sure, it's big and meant to be carried over the shoulder instead of in a scabbard, but it's extremely well balanced and easily wielded by people of larger stature and physical strength.

The Great Sword features a large guard with side rings and integral parrying hooks that allow the blade to be "choked up" on for close range sword techniques.

The leather-covered wooden handle comfortably affords a full two-handed grip, and is capped by a heavy steel pommel that helps counter balance its long blade.

If you're looking for the ultimate in big, beastly and awesome sword, you've found it with the Two Hand and a Half Sword.

**Norman Sword**

Cold Steel is pleased to offer you our version of the sword ancient Norman warriors used as they crossed the English Channel to conquer Britain at the battle of Hastings in 1066 A.D.

Like the original swords we have studied, our replica offers a long, wide blade with two fully sharpened edges and a broad point. Streamlined weight, increased "hardness", and maximum eye appeal have added a broad fuller to the middle of the blade.

The flout of Norman Swords was also very ornate featuring upturned, spatulated quillons, a leather over-wood grip and a modified "cocked hat" pommel. This ornate shape was chosen because it allows greater articulation of the hand while counter balancing the long heavy blade.

**Italian Long Sword & Dagger**

Historically, the Long Sword featured a distinctive cruciform hilt and a long, double edged blade that was equally adept at opposing both light and heavily armored foes. Its extra-long blade offered the reach and leverage for powerful stabbing, cutting and chopping strikes, while its long cross guard and heavy pommel were useful for hooking, striking and slashing.

When heavy plate armor was encountered, strikes with the edge were often abandoned in favor of a "Half-swording" technique, where one hand grips the hilt and the other the blade for grappling and in-fighting. To better direct the point in powerful jabs, and to accurately thrust at the small gaps and joints in a suit of armor.

Cold Steel's Italian Long Swords is designed in that the blade and balance slightly favor the thrust, while still allowing its capability of delivering astonishingly effective cuts. It features a simple cruciform hilt, long upturned cross guard, leather over-wood grip, and a heavy counter balancing fish tail pommel.

Scaled down in size but almost identical in appearance, our optional companion dagger is sharply tapered with a double-edged blade. Ideal as an off hand parrying tool, a back up blade or just as a fine dagger to wear on your belt.

**Hand and a Half Sword & Dagger**

There are few swords that are more versatile or effective than the "Bastard" or "Hand-and-a-Half Sword". It is extremely light, fast and deadly in offense or defense and brutal all forged from tough, high carbon steel with a hard spring temper. Equipped with two fully sharpened edges and a strong, pinpointed effective point it commands respect at first glance!

Its long handle is suitable for use with both one or two handed grip, and is fashioned out of wood covered in black leather. To balance the Hand and a Half Sword's long blade the butt is capped with a "hook stopper" style pommel.

An optional companion dagger is also available. Sculled down in size and almost identical appearance, fit, finish and materials in both make a terrific off hand parrying weapon and can stand alone in its own right as a dagger you can wear with pride on any occasion.

Every Hand and a Half Sword and dagger reflects the highest standards in workmanship and materials. To safely house your sword and dagger, we have also utilized decorative scabbard moulded wood covered with black leather, with steel threat and chape.

The Man at Arms was a stalwart and dependable fighter who exhibited great martial prowess with a range of weapons. He was a capable and competent warrior who was the vanguard of many conflicts and was often first into the fray. Although he was not a Knight, he fought and trained alongside them as a brother in arms. To honor these rugged, reliable, salt-of-the-earth warriors we have created a range of true journeyman’s weapons that we have called the Man at Arms Collection.

**MAN AT ARMS SERIES**

**A**
- **MAA Chinese War Sword**
- **Weight:** 61.9 oz.
- **Thickness:** 1/4"
- **Blade Length:** 23"
- **Steel:** 1055 Carbon
- **Overall Length:** 38"

**B**
- **MAA Italian Dagger**
- **Weight:** 20.2 oz.
- **Thickness:** 1/4"
- **Blade Length:** 12 3/4"
- **Steel:** 1055 Carbon
- **Overall Length:** 19 3/8"

**C**
- **MAA Italian Long Sword**
- **Weight:** 49 oz.
- **Thickness:** 1/4"
- **Blade Length:** 35 1/2"
- **Steel:** 1055 Carbon
- **Overall Length:** 55 1/2"

**D**
- **MAA Two Handed Great Sword**
- **Weight:** 109.4 oz.
- **Thickness:** 1/4"
- **Blade Length:** 40"
- **Steel:** 1055 Carbon
- **Overall Length:** 55 1/2"

**E**
- **MAA Hand-And-A-Half Dagger**
- **Weight:** 19.4 oz.
- **Thickness:** 1/4"
- **Blade Length:** 13"
- **Steel:** 1090 High Carbon
- **Overall Length:** 19 1/2"

**F**
- **MAA Hand-And-A-Half Sword**
- **Weight:** 50.4 oz.
- **Thickness:** 1/4"
- **Blade Length:** 33 1/2"
- **Steel:** 1055 Carbon
- **Overall Length:** 45 1/2"

**G**
- **MAA Norman Sword**
- **Weight:** 48.2 oz.
- **Thickness:** 1/4"
- **Blade Length:** 30"
- **Steel:** 1055 Carbon
- **Overall Length:** 36 3/4"
The Arming Sword takes its inspiration from the side arm of choice for many of history’s foot soldiers and journeyman warriors. Simpler and more agile than many of the heavier swords on the battlefield, this double-edged blade was light enough to be easily wielded with one hand, and stiff enough to find vulnerable gaps in a knight’s plate armor, or burst through his mail! Our interpretation of this lightning fast fighter’s sword is made from expertly heat treated carbon steel and richly blued to an inky black finish. Featuring pronounced upturned parrying quillons, a fluted leather grip, and a counter balancing wheel pommel, the Arming Sword is beautifully balanced, and, with all blued steel fittings, it’s good looking too!

The MAA Arming Sword is sold complete with a hand stitched black leather scabbard.

**COMPANION DAGGER**

The MAA Arming Dagger is a scaled down version of its companion sword. With the same materials, fittings and finish, it’s essentially a smaller sword! An excellent companion blade or offhand parrying tool, it also makes an attractive stand-alone dagger that’s sure to turn heads when worn on your belt!

**MAA Lafontaine Sword of War**

Designed by noted swordsman Luke Lafontaine and bearing his name, the Lafontaine Sword of War combines elements of a 16th Century “Sword of War” with a “Complex Hilt Longsword”.

Not carried on a belt or baldric, rather it was held in hand, rested on the shoulder or simply carried by a manservant or page. Designed primarily for battlefield combat, it was almost as big as a Zweihander or a Great Sword; with a long double edged blade, elaborate ring guards, counter guards, and peaked quillons, a fluted scabbard for keeping a finger through the cross to add control, and a heavy counter balancing pommel that made a formidable weapon in its own right!

A versatile and complex weapon with many advantages that should be apparent to any Historical European Martial Artist, it was also a symbol of prestige that said much about the status and prowess of its wielder.

Made in our signature “Man at Arms” style, the Lafontaine Sword of War features a 1055 Carbon Steel blade that has been deeply blued to an inky black sheen. The Lafontaine Sword of War is fully sharpened and supplied complete with a thick leather and steel scabbard.

**MAA Messer**

Designed by Luke Lafontaine and Dave Baker, Cold Steel’s one-handed Messer is a sword that has to be held to be appreciated! This modern interpretation of the historical German Langes Messer (or Long Knife) is beautifully balanced and a joy to use. Sharper and lighter than many of our current offerings, it handles almost like a giant Bowie Knife!

Its clip-point style blade is fully sharpened on the primary edge, with an un-sharpened “false edge” terminating in a sturdy upturned point. The Messer’s stylish and functional cross-guard, knuckle bow and pronounced shell-shaped “Nagel” are also blued to match the blade and enhance the rich brown of the rosewood handle scales.

Complete with a black leather scabbard with black fittings, this beautiful addition to our Man at Arms series has already become a firm favorite with our crew, and we’re sure it will be a popular addition to your collection!

**MAA Shell Hilt Dagger**

Our Shell Hilt style “Main Gauche” is a parrying dagger designed to be used in conjunction with a longer blade. Its lengthy solid steel quillons and shell guard protect the user’s hand from incoming attacks while offering plenty of leverage for deflecting, parrying and temporarily binding the opponent’s blade. Blued to a deep black finish, with contrasting brown leather grip, the Shell Hilt Dagger is as good looking as it is effective!

**MAA Crab Claw Dagger**

This beautiful parrying dagger features multiple “crab claw” quillons to block, trap or manipulate an opponent’s blade, while its solid steel and guard offers exceptional hand protection. This Crab Claw Dagger’s soft 31” blade is expertly heat treated and deeply blued to a rich and lustrous finish before hand-sharpening. Featuring an attractive wire wrapped handle that is large enough to accommodate modern fencing gloves. For ease of carry and display, the dagger comes complete with a sturdy leather sheath with richly blued steel throat and chape.

**Specifications**

- **MAA Arming Sword & Dagger**
  - Weight: 22.8 oz.
  - Thickness: 1/5”
  - Blade: 13 1/2”
  - Steel: 1090 High Carbon
  - Overall: 20”

- **MAA Lafontaine Sword of War**
  - Weight: 78.5 oz.
  - Thickness: 1/4”
  - Blade: 37 1/2”
  - Handle: 14 1/2”
  - Steel: 1050 High Carbon
  - Overall: 52”

- **MAA Messer**
  - Weight: 30.9 oz.
  - Thickness: 5.5 MM
  - Blade: 22”
  - Handle: 6”
  - Steel: 1090 High Carbon
  - Overall: 28”

- **MAA Shell Hilt Dagger**
  - Weight: 22.4 oz.
  - Thickness: 1/5”
  - Blade: 12 1/2”
  - Handle: 6”
  - Steel: 1090 High Carbon
  - Overall: 19 1/2”

- **MAA Crab Claw Dagger**
  - Weight: 27.1 oz.
  - Thickness: 5.8 MM
  - Blade: 17”
  - Handle: 6”
  - Steel: 1090 High Carbon
  - Overall: 23 1/4”
**English Backsword**

“**What a blade weapon is a short snap light sword, to brand, to draw, to run**.** A nimble metal, to strike, to cut, to thrust both strong and quick.**

---

**Paradoxes of Steel, Bruce Sax, 1999**

We are proud to add our interpretation of the 17th Century English Mortuary Hill Sword. Inspired by historical examples, this sword single-handed sword is fast and lively in the hand and a sheer delight to train with. Able to land a decisive blow even when cutting fast from the wrist, this beautiful sword has already proven to be very popular among our crews, those who have proclaimed it to be one of their favorite one-handed cutters. Made from 1055 Carbon Steel and supplied with a mild patina to give an "antiqued" finish, each English Backsword is fully sharpened and supplied complete with a serpentine leather and steel scabbard. An excellent addition to the collection of any Historical European Martial Artist or Historical Reenactor.

---

**Scottish Broadsword**

The infamous weapon of the Highland clansman, the Scottish Broadsword has a long, double-edged blade and a distinctive basket hilt, and, when combined with targe and dirk, has proven to be more than a match for enemy soldiers on battlefields across the world. Cold Steel has chosen to make its own interpretation of this famous sword. Hand forged 1055 Carbon Steel, expertly heat treated and beautifully polished with triple fullers, our blade is capable of passing the stringent British Proof test.

The Sword’s basket hilt is made of black steel with a wood grip covered in ray skin and wrapped in wire. Finally, the Broadsword is safely housed in a wood and leather scabbard with a black steel chape and throat.

---

**Scottish Dirk**

Cold Steel is proud to offer quite possibly the finest production Scottish Dirk on the market today. Unlike many replicas - which have downgraded into blunt nothings and costume accessories for stage and screen - our modern version of this historical blade is fully functioning tool. The wide, sharp 13” blade is forged to a hard spring temper from 1055 carbon steel, while the intricately hand-carved Rosewood handle is beautiful as it is functional.

The Scottish Dirk by Cold Steel is just as treasured for generations.

---

**Aluminium Head**

This elegant sword cane closely resembles our popular City Stick, and comes with a removable highly polished Aluminum head. It features a tough fiberglass carbon fiber composite shaft that can be used as an effective self-defense tool in its own right. The light and fast blade has a tapered square cross section with a sharp point.

**Pistol Grip**

With a finely crafted solid Aluminum head, our pistol-grip cane is safer, lighter, better balanced and easier to carry and use than ever before!

**Heavy Duty**

The Cold Steel Heavy Duty Sword Cane is quite possibly the toughest and widest sword cane ever built! It features an extra strong partial crook handle made from heavy duty nylon, and a strong black aluminum shaft that’s heat treated for strength. The tapered shaft is caged with a plastic ferrule for better traction on slick, icy sidewalks or uneven terrain. The concealed blade is released by quickly pulling on the handle to break the suction of its friction lock. Made from Stainless Steel with a proprietary heat treatment and tempering, it’s a hard and resilient blade that’s sturdy enough for both cutting and thrusting. This is no mere show piece! This Cane conceals a true battle-ready sword, proven in our infamous PROOF videos to make the kind of cuts one would expect from a high quality saber!

**Quick Draw**

Cold Steel has long extolled the virtues of Sword Canes. These dapper and discrete self-defense tools are not threatening and just plain stylish! Hiding in plain sight until needed - then they spring into action in a heartbeat!

Our latest Sword Cane, the Quick Draw, features a black aluminum shaft that is lightweight and durable, with a rubber ferrule tip to aid traction when walking on slippery or uneven surfaces.

A short, swift pull on the Griv-Ex pistol grip handle will disengage the friction seal and quickly pull on the handle to break the suction of its friction lock. Made from Stainless Steel with a proprietary heat treatment and tempering, this is a hard and resilient blade that’s sturdy enough for both cutting and thrusting. This is no mere show piece! This Cane conceals a true battle-ready sword, proven in our infamous PROOF videos to make the kind of cuts one would expect from a high quality saber!

Cold Steel’s Thompson Saber is not a historical or period-specific sword rather it is a newly developed, thoroughly modern saber. Designed by Cold Steel President Lynn C. Thompson, and bearing his name, the Thompson Saber was created to Lynn’s exact specifications. Lynn said, “I wanted to make a blade sword, felt a dueling sword as such, but a true swordfighter’s blade for the modern martial artist.” It’s ground to my exact specifications, at a slight curve from the cut over the thrust, it’s hair shaving sharp for the first six inches from the point, then gradually less sharp down through the rest of the blade, leaving enough material to block, parry and even bludgeon an opponent’s blade. It’s deeply blued to aid in rust resistance, but also to make the blade harder to see in the fast paced cut and thrust of combat!

The Thompson Saber has a modified 1904 Saber guard and a similar yet modern grip that will accommodate even big modern fencer’s gloves. The Thompson Saber comes complete with a leather belt frog for ease of carry. With a heavy duty thick leather and steel scabbard that will accommodate even big modern fencer’s gloves. The Thompson Saber comes complete with a leather belt frog for ease of carry.

1917 Series

With their deeply blued blades and rich Rosewood handles, our 1917 series blades are instantly recognizable! These knives and swords all share the same sleek lines, utilitarian, practical design. Evoking a spirit of adventure, from the American frontier to the High Seas, our 1917 series of swords, sabers, cutlasses and knives are perfect for any historical reenactment group from the 1830’s onwards, Cowboy Action Shooters, Civil War or Naval Battle reenactment, even modern military groups.

Tactical Rondel

Our Tactical Rondel is a fascinating hybrid inspired by our “1917” series of knives and swords. Taking our medieval Rondel Dagger as a starting point, we began exploring the modern combat potential of this specialized weapon. The armoring capabilities of the Rondel simply cannot be ignored, and as the modern battlefield warior’s kit includes more and more armor, gear, tools and padding, the merits of a dedicated piercing tool become apparent.

The Tactical Rondel’s stiff blade has extra-deep hollow ground blade bevels that are hard-drawn to create 3 sharp edges and a needle like thrusting point! The handle is big enough to accommodate even gloved hands, and the classically inspired dish guard and pommel provide excellent protection when making hard thrusting strikes.

The Tactical Rondel’s sheath is also inspired by our “1917” line. Made of soft hand-stitched black leather, with a blued steel throat and chape, it hangs comfortably from the belt via a leather frog, and, thanks to its stud and loop construction, it is easy to remove without detaching all of your gear.

1917 Frontier Bowie

The Frontier Bowie features a wide, sharp blade with a generous clip and fuller. Made from 1085 High Carbon Steel, it is heat treated to a hard spring temper and beautifully blued to a lustrous finish. The Frontier Bowie’s big “S” shaped guard offers excellent hand protection while the slim, flat profile of the modified pistol grip handle results in tensioning your hand, and keeps your edge alignment true. Each Frontier Bowie comes complete with a lightweight leather sheath with a blued steel throat and chape.

1917 Cutlass

Cold Steel’s modern interpretation of the classic 1917 US Naval Cutlass is an authentic as possible. For instance it features the curved blade, short clip point and iconic half-basket guard of the original as well as a deep blue finish on all metal parts. The scabbard and belt loop are also highly accurate reproductions and are fashioned from high quality leather complete with brass and copper “furniture.”

Improved 1917 Cutlass

Our improved 1917 Cutlass is identical in every way with the original except we have substituted a far more effective guard. Made from heavy steel plate with multiple “lightening holes,” and featuring rolled edges it is far more durable than the original Cutlass while offering superior hand protection and maximum bulk.

1917 Saber

Our 1917 Saber is essentially a scaled up version of our improved Cutlass. Designed to be an oversize cut and thrust weapon for the battlefields. Its heavy 31” blade and improved 31” blade guard provide all the reach and cutting power you’re looking for and unparalleled protection for your sword hand. Each saber is deeply blued and comes with a hand sewn black leather scabbard and belt loop with matching frog.
**CINQUEDEA**

The Cinquedea (Ching-kwi-dea) has held a long fascination for us at Cold Steel. It gained popularity as the weapon of choice for sabaudine warriors walking through the narrow Alleys and walled cities of Italy. A blade was primarily exclusive for civilian self-defense. It was essentially the precursor to the civilian side sword and the rapier – and yet, this instrument of personal protection seems to have needed little if its design to function as it did in the cut and thrust of mortal combat!

Surviving examples of these unusual short hand held and deeply tapered blades are often highly embossed and were with either of gold blades and deep multiple falters that border on jewelry rather than weaponry - but beneath the ornamentals of high renaissance fashion lay a tool made with purpose. A wide, stiff and thrust blade that could be brought with ease and strength to retain a space, and deliver a mortal wound!

Our interpretation of the Cinquedea is made from expertly heat treated 1060 Carbon steel with a highly engraved guard and pommel, and a hand-carved grip. The Cinquedea is solid complete with a leather sheath and with engraved steel throat and chape.

---

**RIBBED SHELL SWEEPT HIlt RAPIER & DAGGER**

The Rapiers enjoyed a long reign as the civilian weapon of choice for self-defense and dueling for centuries. Its long, double-edged blade was ideal for delivering the point at great distances. Its elegant battle breaking from rings, bars and quillons, to shells, and chiseled cup offered excellent protection and caught or deflected blows with ease. Sadly, the rapiers eventually succumbed to the dictates of fashion and gave way to smaller swords. Our modern interpretation of this historical classic has a long, narrow blade with a wide single fuller to assure perfect balance. Its hilt features a classic ribbed steel and multiple bars, quillons and a knuckle bow for hand protection. The grip is made of wood covered with rich black ray skin and wire and terminates in a heavy ribbed pommel that serves as a perfect counter balance to our Rapiers blade.

Our Parrying Dagger, with its dangerous dual edged blade and upturned trapping quillons, has been designed to perfectly complement our Rapiers.

---

**CAVALIER RAPIER**

By the mid-1600’s dueling was at the height of its popularity. In fact, this trend for settling affairs of honor with steel reached such heights that King Louis XIII of France outlawed dueling for fear of losing too many of his important diplomats to this dangerous pursuit!

Aristocratic noblemen saw it as their manly duty to defend their honor at sword-point, and as such began not only practicing the knowhow and maneuvering required by specialist sword masters, but also experimenting with new types of weaponry to help them gain an edge.

One particular sword began to gain popularity - a smaller, lighter and faster version of the Rapiers that was easier to carry and quicker in combat. A precursor to what would eventually become the Small Sword referred to by many simply as the “transitional rapier”.

Cold Steel’s interpretation of this blade features a sharp double edged and needle tipped blade which is decidedly shorter and lighter than a classic Rapiers. Cold Steel’s interpretation of this blade features a sharp double edged and needle tipped blade which is distinctly shorter and lighter than a classic Rapiers, allowing for much more speed and agility.

With a tempered steel pierced shell guard, rings, quillons and knuckle bow it offers astonishingly good hand protection, while its wire wrapped grip and counter balancing pommel give great comfort and liveliness in hand.

Provided complete with a hand-stitched leather sheath with steel throat, chape and inox steel belt hook for ease of carry.

---

**SMALL SWORD**

The Colichemarde emerged during the decline of the Rapier and rise of the small sword. With a uniquely shaped blade that was extra wide at its base but then dramatically tapered to a fine needle point. This allowed the sword to be used to parry or oppose even the heaviest weapons, yet remain light enough to be wielded with lightning speed. Cold Steel’s interpretation of this blade closely mirrors the historic original, from extra wide forte to super sharp point. The hilt features a decorative double shell guard, complete with finger loops and knuckle bow, while the grip is completely wire wrapped and capped with a matching pommel. We have also created a matching dagger as an optional choice to this exquisite sword, with a beautifully polished blade, double quillons, and wire wrapped handle.

1796 Light Cavalry Saber
Our Cold Steel 1796 Light Cavalry Saber is inspired by the same swords used by the British and their allies at the Battle of Waterloo. Its distinctive blade profile is considered by some to have been derived from the Indian Talwar, and it gained such popularity that it remained in use by the German Cavalry until the beginning of the twentieth century! But this is more than just an historically inspired design – it’s a high quality modern saber that is fully capable of passing the famous British Proof Test for quality and durability.

With a hand-forged and beautifully balanced blade, the Saber features a solid brass hilt that will accommodate even a large gloved hand. Supplied with an excellent wooden scabbard covered in black leather and fitted at either end with highly decorative brass furniture, our Talwar is a sword to be admired!

We are grateful to Nidar Singh Nihang for his valuable insights into the traditional combat application of the Talwar.

1830 Napoleon Saber
Napoleon’s cavalry was the bane of the European battlefield. His troops were equipped with first rate blades, manufactured in a state-of-the-art factory dedicated to producing the finest edged weapons of the day. Our 1830 Napoleon Saber takes inspiration from these exceptional swords, with an elegantly curved 1055 Carbon Steel blade and long, wide fuller, culminating in a very sharp, but practical point. The grip is equally well made. It’s wrapped in black leather and strongly protected by a stout, brass three bar hilt. The whole package comes with a heavy duty hand polished scabbard with dual rings for attachment to a baldric or sword belt.

During the American Civil War, there were two types of saber issued to the Cavalry: one “light” and one “heavy”. The light version was popular, but the heavy model, often correctly dubbed the “Old West Blunder” was considered by many to be the one to carry into battle!

With a lengthy 36” blade, it differed distinctive reach advantages over most blades, and its added weight greatly enhanced leverage and power. Taking inspiration from antique blades in private collections, our saber is made from 1055 carbon steel with a hard spring temper that is capable of passing the famous British Proof Test. The blade is combined with a keen edge and a narrow cross section, complemented by a brass crossbar hilt and a faux buffalo horn handle that will accommodate even a large gloved hand! Supplied with an excellent wooden scabbard covered in black leather and fitted at either end with highly decorative brass furniture, our Cold Steel 1830 Napoleon Saber is a sword to be admired!

Weight: 34.2 oz.
Overall: 37 3/4”
Blade: 33”
Thick: 5/16”
Steel: 1055 Carbon

1860 Heavy Cavalry Saber
During the American Civil War, there were two types of saber issued to the Cavalry: one “light” and one “heavy”. The light version was popular, but the heavy model, often correctly dubbed the “Old West Blunder” was considered by many to be the one to carry into battle!

With a lengthy 36” blade, it differed distinctive reach advantages over most blades, and its added weight greatly enhanced leverage and power. Thick: 5/16”
Steel: 1055 Carbon

Scimitar
Inspired by highly decorative antique Persian blades, Cold Steel’s latest Scimitar is a true Eastern jewel. Its handsome blade is deeply curved to facilitate the devastating draw cut, and beautifully polished with a wide, deep fuller. Made from highly heat treated 1095 carbon steel, its perfectly balanced and hand honed to a keen edge!

The Scimitar’s large S-guard and tang are intricately engraved and a very sharp point. It’s combined with a keen edge and a narrow cross section, complemented by a brass crossbar hilt and a faux buffalo horn handle that will accommodate even a large gloved hand! Supplied with an excellent wooden scabbard covered in black leather and fitted at either end with highly decorative brass furniture, our Cold Steel Scimitar is a sword to be admired!

Weight: 38 oz.
Overall: 34”
Blade: 30”
Thick: 1/3”
Steel: 1095 Carbon

We have long admired the timeless good looks and pure functional design of the American Rifleman’s Knife. This rare blade was originally issued in extremely limited numbers, and has the distinction of being the first knife officially designed for, and purchased by, the U.S. Army back in 1849. Our blade takes inspiration from an antique in the private collection of our company President Lynn C. Thompson, and while our blade is not an exact replica, it features many of the design nuances that make the knife such a classic!

It’s big, stout spear point blade is stiff enough to oppose even much larger weapons, making it an ideal complementing knife to carry and use alongside a saber or cutlass. Plus, its hefty, 12” blade and solid guard make a more than capable stand-alone blade in its own right! It’s easy to see why it was chosen as a back-up blade for our nation’s riflemen.

The Cold Steel 1849 Rifleman’s Knife is hand forged from 1085 High Carbon steel, with a solid brass guard and beautiful Rosewood handle scales that encapsulate the sturdy full tang. The Rifleman’s Knife is sold complete with a high quality hand-stitched leather sheath and belt frog, with polished brass throat and chape. Perfect for reenactors and collectors alike. Add one to your collection today!

Rondel Dagger

Cold Steel’s Rondel Dagger is inspired by historical examples of the combative incarnation of this medieval dagger. Rather than a multi-purpose tool, this version was a specialized weapon. A side arm developed for in-fighting, to pierce mail or heavy clothing, and to slip through gaps in plate armor. The long, straight triple-edged and hollow ground blade is incredibly stiff and terminates in a needle sharp point. The blade is richly blued, then the edges are hand polished, giving the Rondel its handsome appearance. The handle of the Rondel Dagger is turned and intricately hand-carved from Rosewood, with brass pins added to give further decoration and more traction to the grip. The period correct brass guard and pommel are further embellished with file work and offer incredible hand protection.

An historically accurate hand-stitched leather sheath with blued steel throat and chape allows the Rondel Dagger to be tied to a belt or baldric and comfortably worn in a variety of positions. Perfect for Historical European Martial Arts practitioners who are studying the treatise or manuscripts on rondel application, or a fine addition to the collection of a historical reenactor or weapons enthusiast.
Taking inspiration from the classic “Trench Knives” from both World Wars of the last century, we have developed a series of new tactical fixed blades that are suitable for the challenges faced by today’s modern day warriors. Our Chaos series fixed blades are equipped with unique “D” ring guards made from reinforced 6061 aluminum, allowing for an incredibly secure and comfortable grip while protecting the hand both from incoming attack and damage while striking or cutting an opponent who’s covered in body armor, ammo, flashlights, magazines and gear! Their extra thick 1055 carbon steel pommels are tapered to concentrate the percussive force of a hammering strike, and their full tang SK-5 High Carbon steel blades are expertly heat treated for maximum performance. Their tough Secure-Ex® sheaths are Molle-Lok and Tek-Lok compatible, with rugged adjustable Cor-Ex belt loops and retaining straps for a secure and reliable lock up when not in use. The Chaos series combine maximum safety and security with extreme performance and combat potential.

**Chaos Stiletto**

The Chaos Stiletto’s Drop Forged SAE 4140 blade features an isosceles triangular cross section with deeply below ground hollows creating three sharp edges and a slightly curved tip that terminates in a needle sharp point.

**Chaos Tanto**

**Chaos Kukri**

**Chaos Double Edge**

**Nightfall Series**

Our Japanese San Mai II blades have been a Cold Steel staple for decades. Coveted by Martial Artists and knife collectors alike, they are still much in demand, but the luxury fixed blades are only produced in very limited numbers. With this in mind, we created the Nightfall Series – Made with the same level of quality and attention to detail as our Japanese classics but trading San Mai for premium American CPM 3-V powdered steel. Each of these tough, reliable blades features a Kray-Ex™ grip and a highly wear-resistant DLC (diamond like) coated blade, that’s honed to a screamingly sharp edge. All come complete with a Secure-Ex® sheath.

**3V Recon Tanto**

Over the last 35 years, Cold Steel has succeeded in establishing the Tanto as a superior blade for military application. Our pioneering research, development and refinement of this blade shape has proven the value of the “American Tanto” style reinforced point beyond question. Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen extraordinary applications in numerous conflicts over the last 20 years, it is well on the way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil.

Experience the extraordinary quality—test the distinctive razor sharp edge for yourself and you will see why the Recon Tanto is a knife you can’t afford to be without!

**San Mai III Classics**

Each model in this series of luxury high-performance knives is hand made in Japan from Laminated VG-1 San Mai III®.

**TRAIL MASTER in San Mai III®**

The Cold Steel Trail Master represents the culmination of years of development, field testing and modification. Designed by Lynn C. Thompson, it was devised with the aim of becoming the best all-purpose bowie knife in the world. From its broad clip point and hand honed, razor sharp blade to its extra sturdy non-slip Kray-Ex® handle, the Trail Master is built to perform. Popular with hunters and survival experts as well as with military personnel who appreciate a larger fixed blade that can serve multiple roles in hard conditions, the Trail Master is a rugged Bowie that will be your trusted companion whatever your mission! This model features VG-1® San Mai III® steel and is hand made in limited edition in Japan. It comes complete with a Kray-Ex® sheath.

**Gurkha Kukri in San Mai III®**

Cold Steel’s Gurkha Kukri was inspired by Cold Steel President, Lynn C. Thompson’s close association with Dr. Murray Joy, chief instructor of the American Bando Association — and it still bears their insignia to this day. Gaining notoriety as the infamous fighting knife of the Gurkhas, the Kukri remains a popular blade with Military and Special Units all over the world. As a survival tool, a bush craft blade and as a tactical knife its hard hitting, finely honed, razor sharp blade to its extra sturdy non-slip Kray-Ex™ handle, the Trail Master is built to perform! Popular with hunters and survival experts as well as with military personnel who appreciate a larger fixed blade that can serve multiple roles in hard conditions, the Trail Master is a rugged Bowie that will be your trusted companion whatever your mission! This model features VG-1® San Mai III® steel and is hand made in limited edition in Japan. It comes complete with a Cor-Ex™ sheath.

**Laredo Bowie in San Mai III®**

The Laredo is one of our most iconic knives. This limited edition Bowie is built along traditional lines, but with some of the finest materials available. The Laredo’s elegant flat-ground San Mai III® blade is hand honed to hair splitting sharpness, with a fully sharpened “false edge”. Its richly polished Micarta handle and brass furniture are made to the highest possible standards. Each inch of this highly performance blade is designed for function first. Finely balanced, sharp and durable, this Bowie is capable of putting in your work and looking good while doing so. Produced in super-limited numbers by our master blade smiths in Japan, this knife is highly collectible and much prized by blade enthusiasts who admire not only its beauty as a piece of art, but also its functionality as a classic fighting blade. It comes complete with a black leather sheath.

**American Bando Association Insignia**
The Warcraft Tanto series represents our latest design concepts for modern military tactical tanto design. Noticeably thicker than many of the knives on the market today, with tough reinforced tips, elegantly curved cutting edges and sturdy one-piece construction, they will soak up punishment while delivering unprecedented performance in the field. Each of our Warcraft Tantos is made from the highest quality American CPM-3-V steel, with a flat ground primary cutting edge and a chisel ground secondary blade bevel, both hand honed to hair popping sharpness. The intersection of these two blade bevels (known as the Yakote) forms a wickedly effective secondary point that allows for a devastating snap cut. The Warcraft is also DLC coated (Diamond like Coating) to make it highly rust and scratch resistant, while also reducing glare and minimizing friction. The thick, full tang, is encased in 3D machined G-10 scales, making our Warcraft series comfortable and secure in hand, and equally at home as a reliable workhorse or life-saving combat knife.

Available in three sizes, the Warcraft is quite possibly the highest quality premium tactical fixed blade in the world today. All come complete with a Secure-Ex® Sheath.

**AK-47 FIELD KNIFE**
Our AK-47 series of blades have set the standard for hard-use tactical folders. A firm favorite with military personnel and special units, these rugged folding knives have seen use on all the world’s major armed conflict zones. When we decided to explore designs for a multi-purpose fixed blade field knife that would be suitable for military use, we kept coming back to our classic AK-47 design. Designed by Andrew Demko, the AK-47 Field Knife is enormously sturdy. Expertly crafted from CPM-3-V steel, the AK-47 Field Knife has a thick, broad clip point blade that allows for a highly effective secondary point that allows for a devastating snap cut. The AK-47 Field Knife is also DLC coated from the tip of its beefy saber ground clip point blade through its full tang and integrally pattern engravings and hardening, super tough finish. Supplied with a matching Secure-Ex® sheath, the AK-47 Field Knife is the perfect companion for today’s modern military personnel.

**LEATHERNECK SERIES**
The Cold Steel Leatherneck Series is comprised of two distinct and iconic blade styles, both of which have proven to be exceptionally popular with our brothers and sisters in the armed forces: The Leatherneck-SF (for Semper-Fi) has a beautiful hand honed saber ground clip point blade, and the Leatherneck Tanto features our signature Cold Steel “American Tanto” blade with a stout reinforced tip for extra strength. Both are made from tough D2 Tool Steel with a non-reflective black powder coat finish. To keep the user’s fingers from sliding forward onto their keen edge, the Leathernecks come with a solid steel double quillon guard. The handles are made of deeply checkered Kraton™ that totally encompasses the Leatherneck’s extra wide, full tang. The Leatherneck’s handle is capped with a solid steel double quillon guard. oSS

Much prized by hunters, and members of the military community looking for a dedicated combat tool, the double edged OSS was primarily designed for the throat, however, because its twin edges are honed to razor sharpness, it’s also capable of delivering a lightning quick slash in virtually any direction.

MarAuDeR

Honing the name of Merrill’s Marauders - also known as Code name “Galahad”, the United States committed assault unit within the South East Asian Theater of conflict - our Marauder Bowie is rapped, relentless and reliable. It features an extra broad, razor sharp blade, with a continuously curved edge, deep wide blade bevel and formidable clip point. During our intensive and terrifier performance testing of this new Bowie our company President simply uttered one word: “Beastly”.

Suitable for many military, survival and hunting scenarios, the Marauder is equipped with a versatile Secure-Ex® sheath allowing the knife to be fastened comfortably and securely on a belt or pack, or LBV.

SRK IN SK-5

Our SRK Survival Rescue Knife was built with one aim in mind, to produce the toughest multi-purpose survival tool in the industry. A knife you can truly trust with your life.

This practical and tactical fixed blade was immediately embraced by the Military and Special forces community - and issued by the Navy SEALs for B.U.D.S training – who appreciated the SRK’s versatility and durability in even the worst conditions. This version of our tried and trusted survival rescue knife is made from SK-5 steel, and comes complete with a Secure-Ex® sheath.

reCoN tANto IN SK-5

Our Recon Tanto was designed for today’s modern warriors. A much loved and appreciated knife by the Military and Law Enforcement Special units, it was developed to withstand the hardest abuse and the roughest possible conditions. Our signature Cold Steel® Tanto point is specially reinforced to stay sharp even when instrumenting some of the world’s toughest materials. The Recon Tanto in SK-5 comes complete with a Secure-Ex® sheath.

The Peace Makers are astoundingly light and the knife is always easily accessible when you need it. Clipped to the top of your boot and covered by your pant leg, these versatile fixed blades are rendered virtually invisible; furthermore, your hands are cold or wet. For safety and durability, the ergonomic design of the Kray-Ex™ handle is comfortable and adaptable to any grip, and the deep textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

The Cold Steel Kobun is a lightweight knife that takes its name from the Japanese underworld, where the word “kobun” is sometimes used as an indicator of rank that suggests the word “soldier”, or one who takes orders from his “Oyabun” or boss. It’s a fitting name for a knife like the Kobun, which was effectively designed to be “a good soldier”. Proven to be incredibly popular with the Military, where it’s prized for its light weight and discreet profile as much as its durability and cutting potential.

The Kobun features Cold Steel’s iconic Cryo Quench Heat Treated and Sub-Zero Quenched, AUS 8A Stainless Steel, and then subsequently vacuum heat treated and sub zero quenched for added strength and performance and given astone wash finish. A textured Kray-Ex™ handle is comfortable and adaptable to any grip, and the deep textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

The Steel Tiger is a thoroughly modern, tactical interpretation of the Indonesian Karambit. A design collaboration between Lynn Thompson and the late custom knife maker Steven Likarich. The Steel Tiger was designed to possess all the best features of its source hooked blade and to integrate them seamlessly with modern materials and styling. The Steel Tiger’s deeply curved and needle sharp AUS 8A stainless steel blade is vacuum heat treated and sub-zero quenched, taper ground and given a stone wash finish for maximum strength, cutting power, edge retention and performance. The durable Griv-Ex™ core handle fully encapsulates the tang, emerging to create the bolster, thumb-shelf and distinctive encapsulates the tang, emerging to create a superb, non-slip grip that won’t let you down even when your hands are cold or wet. For safety and convenience the Steel Tiger comes with a Military style Secure-Ex® sheath.

The Cold Steel Peace Maker is for you! Lipped to the top of your boot and covered by your pant leg, these versatile fixed blades are rendered virtually invisible; furthermore, your hands are cold or wet. For safety and durability, the ergonomic design of the Kray-Ex™ handle is comfortable and adaptable to any grip, and the deep textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

If you’re in the Military or Law Enforcement, if you’re a hunter or homesteader, or even on a ranch - Cold Steel Peace Makers are for you! Lipped to the top of your boot and covered by your pant leg, these versatile fixed blades are rendered virtually invisible; furthermore, your hands are cold or wet. For safety and durability, the ergonomic design of the Kray-Ex™ handle is comfortable and adaptable to any grip, and the deep textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

Cold Steel has been making push knives for over a quarter century. Over the years we have continually refined our designs, discovering some features and enhancing others. Constantly striving to produce the best push knife in the world. Our Safe Maker series represents the pinnacle of our learning, experience, history, and development. The blades, shafts, and “T” shaped tangs are fashioned from one solid piece of AUS 8A Stainless Steel, and then subsequently vacuum heat treated and sub-zero quenched for added strength and performance and given astone wash finish. A textured Kray-Ex™ handle is comfortable and adaptable to any grip, and the deep textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. **Mini Tac Series**

Cold Steel’s Mini Tac Neck Knives are so slim and lightweight they can be comfortably worn practically all day long! With their rugged Secure-Ex® sheaths, specially designed to snugly retain the blade within allowing a handy strap, they can perform as a handy utility or camp blade, everyday carry knife or rescue tool. Each Mini Tac has high-quality textured G10 handle scales. This feature allows them to lie flat and close against the body while still providing a positive gripping surface. When these scales are combined with integral sub hilt and sculpted Griv-Ex™ provides excellent retention without compromising speed of draw, they can perform as a very sturdy reinforced point, making it ideal for cutting and skinning strokes. The Mini Tac Tanto has been extensively field-tested by our R&D team all over the world, and has proven to be more than capable of processing even the thickest hides.

**Mini Tac Tanto**

The Mini Tac Tanto offers a remarkably wide, stiff blade and a highly textured Griv-Ex handle scales. This feature allows the blades to hug the palm and resist rolling or twisting. Their most notable and eye-catching feature, however, is their double ring handle design. Slip retention without compromising speed of draw, they can perform as a

**Mini Tac Skinner**

Ideal for cutting and skinning strokes. The Mini Tac Skinner has been extensively field-tested by our R&D team. It’s easy to wear all day. Inspired by the Scottish Skean Dhu, but with modern materials, performance and appearance, it’s easy to wear all day. It’s built to carry all day without fatigue. Each Spike is supplied complete with a Secure-Ex® sheath that provides excellent retention and safety.

**Spike Series**

Our Spike series neck knives are slim, light and super-tough. Their razor sharp, zero-ground blades, are made from German 4116 Cryo Quenched Stainless Steel and are complemented by heavily scalloped, treated handle scales that offer a comfortable and secure grip. The Spike’s ergonomic handles feature integral slugs that provide a soft stop for index finger and thumb, while deeply textured and sculpted G10 provides excellent positive traction even when your hands are cold, wet and slippery. Available in four distinctive blade shapes (Bowie, Drop Point, Tanto and Sente), they offer all the strength of a one-piece solid steel construction while still being light enough to carry all day without fatigue. Each Spike is supplied complete with a Secure-Ex® sheath that provides excellent retention and safety.

**Hide Out**

Our Hide Out was designed as a small, inconspicuous and super-functional neck knife. The resulting blade is a true featherweight, weighing a meager 1.5 ounces! Its high satin polished, double-edged Japanese AUS 8A blade is "Scandi" ground, which makes it very sharp and also very stiff, allowing for a strong and durable tip, despite its sharpness. Its full tang is encapsulated in a weather proof Kray-Ex™ handle that has been designed to be very thin and flat. The handle is subtly contoured and deeply checkered to give the hand better retention and security even on such a small, thin knife, while still making effortless transition between grips. A Secure-Ex® sheath and chain lanyard allow you to wear this knife discreetly and comfortably all day long.

**Double Agent Series**

Designed by custom-knife maker Zach Whitson, Cold Steel’s Double Agent neck knives are available with either a Karambit or Clip Point blade style. Thin, flat, and super light (a little over 3 ounces), they are easy to wear all day long. The Secret Edge also comes with a Secure-Ex® sheath and chain lanyard allowing you to wear this knife discreetly and comfortably all day long.

**Secret Edge**

Thin, light, and flat, the Secret Edge is suitable for anyone in the market for an unobtrusive, yet highly effective neck knife. Unlike its heavier, bulkier rivals, the Secret Edge virtually disappears under clothing and, at 3.2 ounces (with sheath!), it’s easy to wear all day. Designed by British knifemaker, Scott Cullen Hume, its lightweight, Japanese AUS 8A blade is “Scandi” ground, which makes it very sharp and also very stiff, allowing for a strong and durable tip, despite its sharpness. The Secret Edge also comes with a Secure-Ex® sheath and chain lanyard allowing you to wear this knife discreetly and comfortably all day long.

**COLDSTEEL**
Cold Steel President Lynn Thompson has become enamored with the simple functionality of drop forged knives. Their solid one-piece construction allows for new levels of strength and durability, and as an avid survivalist, hunter and outdoorsman their bare-bones ruggedness has an undeniable appeal.

These incredibly tough and hard-wearing blades have no leather or wood handle to rot, no loose parts to break, damage or allow to fall out of your pocket. The Drop Forged Boot Knife is strong, sharp, and thanks to its slim profile and one-piece construction allows for new levels of strength and durability, and as an avid survivalist, hunter and outdoorsman their bare-bones ruggedness has an undeniable appeal.

For the money, the Bushman series of survival knives are hard to beat!

Unlike the majority of hollow handled knives, there is no joint or seam between the blades and handles, instead the Bushman’s blade and handles are cold forged out of a single piece of SK-5 high carbon steel! The resulting knives are expertly heat-treated and tempered to RC54 and, when subjected to our tests, have withstood over two tons of pressure on their blade/handle transition! Every Bushman has been carefully ground to an extra thin edge, and then honed and buffed by hand until razor sharp.

Their hollow handles will accept survival supplies or a variety of handle extensions which can maximize reach, leverage or ease of throwing.

Available in two blade styles (Standard and Bowie point) both feature curved blades that are ideal for skinning and a multitude of bushcraft chores. Both come complete with a Secure-Ex® sheath which houses a high-quality Ferrocerium fire steel.

The Pocket Bushman was designed with one clear goal; to create a rugged, dependable folder for camp and utility chores. A knife that could be depended upon for tough outdoor tasks and emergency survival applications, while still being small and handy enough to fit in a pocket or be stowed in a pack.

The Pocket Bushman’s sub-zero cryo-quenched 4116 stainless steel blade is incredibly durable, and capable of taking (and holding) a fantastically sharp edge. It’s long and wide with a sharp clip-point for maximum practicality and versatility in the field.

For the handle, we used a mono-block construction made famous by the classic French “Douk Douk”. There are no liners, handle scales or back spacers. Instead, a single sheet of stainless steel is folded in half to form a housing for the closed blade, as well as supplying the enormous strength and rigidity required to complement our innovative Ram Safe™ lock.

Sheer simplicity, and affordable practicality – the Pocket Bushman is a knife you can depend upon!

Cold Steel is proud to bring a new economical hollow handle survival knife to market - the Survival Edge!

After many years of experimentation with super-tough plastics and injection molding processes, we have created a super-strong survival blade that’s as light as a feather!

With a durable sub-zero cryo-quenched German 4116 stainless steel clip point blade that is a full 1” wide and 5” long, it’s versatile enough to meet the demands of almost any survival situation. The hollow handle is made from the highest-grade Polypropylene available, and has an integral double quillon guard that serves to protect the fingers as well as making it possible to lash the handle to a stick to make an improvised spear. Plus, a twist of the waterproof cap reveals a large hollow handle which accommodates a generous survival kit!

Finally, the Survival Edge comes complete with a weatherproof and super light Secure-Ex® sheath, and high-grade Ferrocerium fire steel.

**Finch Hawk**

A design collaboration between Andrew Demko and Lynn C. Thompson, the Cold Steel Finch Hawk is the latest in our series of inexpensive hard wearing bushcraft and outdoor tools. Its traditional Nordic-styled “Scandi Ground” German 4116 steel blade is sub-zero cryo-quenched for superior edge holding potential, with a steep 7.5mm blade bevel and a functional curving belly for skinning and slicing strokes. Furthermore, its 4” blade is more than big enough for most game processing tasks, and is expertly heat treated to offer an excellent balance between edge holding and ease of sharpening. The handle is made from durable glass-reinforced 2x4 and has an attractive wood grain texture and polished silver embelishments; The Finch Hawk is an amazingly lightweight, versatile and functional, and affordable on almost any budget.

### Specifications
- **Blade**: 4”
- **Weight**: 2.4 oz.
- **Thickness**: 0.09”
- **Material**: German 4116 Stainless Steel

**Kudu**

The Cold Steel Kudu takes its inspiration from the classic ring lock folding knives of Africa. These highly functional blades are everwidened, and carried by people from every walk of life, and are the everyday tool of choice for almost every conceivable task. They have stood the test of time, and have been in use continuously for centuries—and with good reason—they would. The Kudu features a highly rust-resistant and beautifully mirror polished German 4116 Stainless steel blade that is expertly heat treated to offer an excellent balance between edge holding and ease of sharpening. The handle is made from durable glass-reinforced 2x4 and has an attractive wood grain texture and polished silver embelishments; The Kudu is an amazingly lightweight, versatile and functional, and affordable on almost any budget.

### Specifications
- **Blade**: 3 5/8”
- **Weight**: 5.1 oz.
- **Thickness**: 0.07”
- **Material**: German 4116 Stainless Steel

**Finn Bear**

The Finn Bear has a sturdy point for piercing and plenty of belly for skinning and carving. It’s big and strong enough to skin large game, yet thin and delicate enough to slice a tomato or cut an apple. The durable Polypropylene handle has a modified diamond cross-section that will fit your hand like a glove and accommodate a wide variety of gripping methods. To carry your knife safely and conveniently in the field, we are including a pouch that can be easily worn on your belt or tucked into your pack or tackle box.

### Specifications
- **Blade**: 4 1/2”
- **Weight**: 2.8 oz.
- **Thickness**: 0.10”
- **Material**: German 4116 Stainless Steel

**Pendleton Lite Hunter**

Over the years our Pendleton Hunters have become incredibly popular, and many people have asked us for a more affordable Pendleton that will accommodate just about anyone’s budget. In appearance, the Pendleton Lite Hunter strongly resembles its larger’s classic functional design, with a practical drop point blade, modest guard, hollowed bolster area, and a flared butt to aid retention in slippery and inclement conditions. The only major changes were the adoption of sub-zero cryo-quenched German 4116 Stainless steel and the use of high-impact polypropylene for the handle. If you are looking for a dependable and award winning hunting / utility knife that will serve you well for years to come – then you would be hard pressed to beat the Pendleton Lite Hunter.

### Specifications
- **Blade**: 3 5/8”
- **Weight**: 2.7 oz.
- **Thickness**: 0.10”
- **Material**: High-Impact Polypropylene

**Canadian Belt Knife**

The Cold Steel Canadian Belt Knife takes its inspiration from an old 1900’s classic. It has all the features that made the original an award-winning, international favorite plus some modern improvements.

### Specifications
- **Blade**: 4”
- **Weight**: 3.5 oz.
- **Thickness**: 0.10”
- **Material**: German 4116 Stainless Steel

**Roach Belly**

Historically, the Roach-Bellied knife was a short blade with a pronounced gap tooth curve and a sharp point that saw popularity in 17th century Britain and the American Colonies. It was most likely named after the common Roach Fish, which had a similarly round curving belly.

### Specifications
- **Blade**: 4”
- **Weight**: 2.0 oz.
- **Thickness**: 0.09”
- **Material**: Glass-filled Polypropylene
**Sure Balance Thrower**

The heavyweight Cold Steel Sure Balance Thrower is just shy of 13 1/2" long and weighs a little over a pound! Built as heavy as many amateur throwing knives, these professional grade knives fly straight and hit like a freight train, sticking in almost any target! With their expertly heat treated solid 1095 carbon steel construction, they are sure to last many years of hard service, even when used by the most dedicated throwing enthusiast.

**Pro Balance Thrower**

With its substantial hilt and pronounced point, our Pro Balance Thrower was developed for the professional / competitive knife thrower. You can throw from either the blade or handle and it will sink into even hard targets with ease. Made out of sturdy 1095 Carbon steel, with a black, weather resistant finish and equipped with replaceable composite handle scales, it will last for hundreds of years and hit like a freight train, sticking in almost any target! With their substantial heft and pronounced point, our Pro Balance knives fly straight and hit like a freight train, sticking in almost any target! These professional grade knives are packed with precision as well as strength. Perfect for taking on protective coating, the True Flight is a beautifully balanced and hard wearing thrower that also has a sharp, functional utility edge. A great tool also serves as an excellent bushcraft or survival knife.

**Perfect Balance Thrower**

The Cold Steel Perfect Balance takes inspiration from a classic Shimaken or throwing star. Made from 1055 carbon steel, it hits hard and penetrates its target effortlessly. The Perfect Balance's strong 1055 carbon steel construction, black non-reflective finish, and composite handle scales make it durable enough for hundreds of throws. This blade has also become a firm favorite as a low cost utility and hunting tool. Its big fan-style blade and tough spring temper make it a rugged reliable companion for the toughest conditions.

**Optional Sheaths:**

- **Sure Balance, Pro Balance, and Perfect Balance Throwers:** Includes Cor-Ex™
- **Gladius Thrower:** Includes Cor-Ex™

**Sure Strike**

Our Sure Strikes aren't like the cheap, shoddy sport models that penetrate targets like a saucer, it hits on at least one point every time. Our Sure Strikes aren't like the cheap, shoddy throwing stars you see at flea markets, gun shows, and in martial arts magazines. They are precision laser cut from high carbon steel and heat treated to a durable spring temper before sharpening. They are then finished with a black, baked-on epoxy finish to protect them from the rigors of the element and repeated throwing. Available in three weight variations — light, medium and heavy.

**Battle Star**

The Cold Steel Battle Star is quite possibly the largest production throwing star ever offered. Its large spikes are almost 6 inches long and 2 inches wide at the base, tapering to fine sharp points that penetrate even tough materials with relative ease. Big and strong enough to be thrown with either a hand or a heavy duty throwing belt, and balanced and accurate enough to hit with precision as well as strength. Perfect for sport, competition and recreation, the Battle Stars is a must for any thrower's collection.
**Templar**

The Cold Steel Templar is a specialized throwing tool made for modern sport or competition throwers.

Designed by custom bladesmith Dave Baker, the Templar is inspired by an ancient historical throwing tool known as a Hurlbat. Made of a single piece of tough spring tempered carbon steel, the Templar is fun to throw and easy to use. When it comes to “sticking” potential, it’s the best thing to a shuriken or throwing star, landing with a satisfying “thunk” over and over again. With an a-line style head, top and back spikes and a tapered spined handle, it is hard at almost any distance and rotation, and thanks to its head heavy balance it is capable of being thrown over extended distances.

**Dimensions:**
- **Overall:** 14”
- **BLADE:** 7 1/2”
- **Weight:** 14.4 oz.
- **Steel:** 1055 Carbon Steel
- **Taper:** 5MM

**Jack Dagger Thrower**

Jack Dagger is one of the most popular and well known knives among throwers in the world. The “King of Flings” has traveled all over the world showcasing his throwing prowess, and has become the go-to trainer for Hollywood’s elite, preparing them for knife wielding roles on the big screen.

Making regular appearances on television dazzling audiences with his skills, the blade, Jack has brought knife throwing to international audiences on a scale that’s hard to believe!

We are proud to introduce a new throwing knife to our line-up that is based on blades used and thrown by the legendary Jack Dagger. Expertly heat treated and made from a single piece of 1055 Carbon steel, and made to Jack’s exact specification, this new thrower is perfect for professional and competitive knife throwers who are looking for a big, wide clip point “Bowie Style” throwing knife.

**Dimensions:**
- **Overall:** 14”
- **BLADE:** 7 1/2”
- **Weight:** 14.8 oz.
- **Steel:** 1055 Carbon Steel
- **Taper:** 5MM

**LaFontaine Thrower**

Luke LaFontaine is a long-time member of our Cold Steel crew. Known primarily for his expertise in Japanese Sword Arts, he is also a highly knowledgeable Western Swordsman, historical fencer and amateur historian. As an actor, stuntman and weapons expert for the big screen, Luke has perfected a wide range of combat skills, including knife throwing. Combining his love of historical weaponry, his passions for “broad and sandal” action adventure movies, Luke has designed an eye catching and fun knife that will serve multiple roles.

The LaFontaine Thrower is heavily curved, with a wide belly, sharp cutting edge and an acutely pointed tip. Quietly deadly is an understated label. With an integral finger guard to stop your hand from sliding onto the sharp edge, and a tapered easy to use handle for throwing, the LaFontaine Thrower is a capable cutting and slashing blade as well as an excellent throwing knife.

**Dimensions:**
- **Overall:** 14”
- **BLADE:** 9 3/4”
- **Weight:** 16.9 oz.
- **Steel:** 1055 Carbon Steel
- **Taper:** 1”

**Shanghai Shadow**

Made from spring tempered 1055 carbon steel and protected by a rust resistant finish, it’s rugged, hard-wearing and dependable.

Popular with sport throwers, the GI Tanto is perfectly balanced and capable of being thrown by the blade or handle. In a survival or self-defense situation, it can easily convert into a spear tool! Just remove the handle and use the blade securely to a suitable wooden shaft.

**Dimensions:**
- **Overall:** 16”
- **BLADE:** 9 3/4”
- **Weight:** 16 oz.
- **Steel:** GI Tanto
- **Taper:** 5MM

**Shanghai Warrior**

The signature ring on our Shanghai Warrior’s massive blade is safely contained within a versatile Secure-Ex® sheath.

High-impact polymer scales make it comfortable to use. A functional and tough tool that will also be handy to have on your next camping trip or back-up or bug-out bag.

**Dimensions:**
- **Overall:** 16”
- **BLADE:** 9 3/4”
- **Weight:** 16 oz.
- **Steel:** GI Tanto
- **Taper:** 5MM

**Toro**

The Cold Steel Torpedo is a lot of fun for target throwing.

The double tapered points slide effortlessly from the hand for a perfect release and offer twice the sticking potential of a conventional throwing knife. When in use, the heavy 2 lb. weight lets you stand way back from the target (15 yards or more) and throw them with surprising form. Popular with Sport Throwers and hobbyists alike, the Torpedo has remained a popular edition to our line-up for many years – and with good reason!

**Dimensions:**
- **Overall:** 12”
- **BLADE:** 7 1/2”
- **Weight:** 12 oz.
- **Steel:** GI Tanto
- **Taper:** 5MM
The War Hammer was perhaps the ideal weapon for one against a knight encased in plate steel! The heavy hammer head could crush the strongest suit of plate with just a few blows. The back spike could do that armor a clean chop! Already proven to be popular with Historical European Martial Artists and reenactors alike, Cold Steel's modern interpretation of the War Hammer is highly maneuverable and can be easily wielded with one or both hands. The broad and headed head forge-forged out of 1055 Carbon steel and diffusely hardened. The point of the spike and hammer face are fully hardened so they can pierce and crush tough materials, while the rest of the hammer is forged to the softer -he absorbs the shock of heavy blows. The handle of our War Hammer is 30" of straight grain American Hickory, and topped with a pair of sturdy steel langettes.

**War Hammer**

- **Overall:** 30"
- **Head Length:** 8 1/2"
- **Primary Edge:** 3"
- **Weight:** 29.5 oz.

Modeled after an early frontier pattern, the Cold Steel Trail Hawk has proven to be incredibly popular with Survivalists, Preppers and Outdoorsmen, who admire its versatility and durability. It’s an excellent chopping tool and has a functional hammer poll with a hardened face so you can drive nails and hammer in stakes. Best of all its extremely lightweight and a cinch to tuck it under your belt or lash it to a pack or shooting bag.

The Rifleman’s Hawk has a functional hexagonal hammer poll designed for serious work, like pounding nails or stakes. Reminiscent of some early American designs, the Rifleman’s Hawk features the “peace pipe” appearance that was commonly used by Native Americans during the last century. In terms of fun and sport, this hawk throws and sticks extremely well. If you want something that hits its target like the proverbial “ton of bricks,” then the Rifleman’s Hawk is for you!

Suitable for re-enactors from any period stretching from the French and Indian War clear up to the final settling of the West in the late 1800’s, our Frontier Hawk is a joy to use! It’s as light as some camp hatchets, but its design allows for a vast amount of cutting potential!

Our Spike Hawk features a differentially heat treated and drop forged blade and tough steel spike. This unusual hawk is very popular with sport throwers, who admire its ability to deeply “stick” into wooden targets by blade or by spike - Effectively doubling the chances of a successful throw! Additionally, a hand crafted leather sheath (designed to safely house the point and edge) is also available and sold separately.

The influence of the Viking’s famous weaponry far out-lasted the reign of the Vikings themselves. Their axes in particular, have influenced many designs that can be seen to this very day. Our Norse Hawk has a curved cutting edge to facilitate deep, slashing cuts and terminates in two sharp points. Traditionally, the bottom point would be used to capture an opponent’s shield, leg, arm, shoulder or neck, momentarily immobilizing or bringing him closer and easier to dispatch. The top point was used to execute direct chops or, with a thrusting motion, to pierce or gouge.

The Norse Hawk remains one of our most popular Tomahawks. Both with reenactors and with sport throwers, who admire its balance, effectiveness and effortless sticking power!

Precision forged from 1055 carbon steel, Cold Steel’s Pipe Hawk offers a long, wide cutting edge and a solid, fully hardened hammer poll that’s turned and ribbed to resemble a traditional hollow pipe bowl. Its fitted with a 22” hickory handle and is heavy enough to be effective as a chopping tool, plus, its solid bowl will drive nails and stakes with the power of a framing hammer.

Note: Does not function as a smoking pipe.
**American Hickory Haft.**

Our Viking Axe is equipped by the Vikings to hook an underwater point was used while the slightly shorter top point was used for cutting surface terminates in two sharp “horns”. Designed to oppose screened foes, the MAAX Gothic Mace features six steel flanges. Each one is profiled and tapered to reduce weight but also add “bite” upon impact, driving and crushing even the strongest plate armor, while the spiked finial at the crown allows the MAA to be used as a structural tool. Wedged between either one or two hands, the Gothic Mace is light enough to use with speed, but stout enough to block, parry and, of course, deliver a crushing blow!

Richly blued to a deep black finish, this gilded looking Mace is sure to be an exciting addition to the collection of any historical European Martial Artist, Historical Reenactor or weapons enthusiast.

**Man At Arms Series**

**MAA Gothic Mace**

- Weight: 10.5 oz.
- Overall: 21 1/2"
- Primary Edge: 6 3/4"
- Handle: Drop Forged
- Overall: 19 3/4"

**MAA Polish Mace**

- Weight: 10.5 oz.
- Overall: 21"
- Primary Edge: 6 3/4"
- Handle: Drop Forged
- Overall: 19 3/4"

**MAA Swiss Halberd**

For hundreds of years the Swiss were widely famed for their battlefield prowess with their infamous halberd. The Swiss Halberd effectively combined the finest attributes of the sword, battle axe and hook into one devastating tool of war. It was able to penetrate the thickest steel armor, and pulverize a stoutly armored knight. The Halberd’s “bark” could also be used to drug a heavily armored knight from his mount. The Cold Steel Swiss Halberd is almost identical to its Heavy Baby historical counterpart, except that ours is made from modern materials, featuring a fully sharpened spike, axe blade and fork (krok) in a multi-function tool that is sure to be popular with historical re-enactors and collectors.

**MAA English Bill**

Like a surprising amount of historical weapons, the English Bill “Bill” hook was originally a agricultural tool. This ancient forestry tool was once used to hook creeping vines and hard-to-reach branches, and when necessary - even rip heavy limbs from trees. It didn’t take much imagination to see the fighting applications of this heavy duty tool. Over time, the Bill began to evolve into a deadly and frightening instrument, complete with its sharpened edges and hooking blades fast, agile and intimidating. A good Bill in the right hands could hook, entangle, thrust, stab, strike and shape with equal ease and opponent even heavily armed and mounted opponents.

Cold Steel’s English Bill represents the highest quality battlefield recreation of this tool. With a fully sharpened blade spike and hook, supported by an extra drop steel socket and stout shaft.

**MAA Sergeant’s Halberd**

The Sergeant’s Halberd is often seen as a ceremonial item, carried in a badge of rank by officers and NCO’s alike, but in the 18th and 19th Century, it was a much feared weapon of war as well. Although it was heavy-duty battle axe.

The Sergeant’s Halberd was actually developed during the age of firearms and was designed to face foes with less protective armor. Lighter, faster and more maneuverable, the Sergeant’s Halberd was a exceptionally quick and extremely effective weapon of war. Cold Steel’s interpretation of the Sergeant’s Halberd is a representative of the battle hardened incarnation of this historical tool. Though it features costly but attractive embellishments and ornamentation, it is still fully sharpened and surprisingly durable. The Sergeant’s Halberd is a perfect addition to the collection of any historical re-enactor or Western Martial Artist and it makes a terminally effective emergency self-defense tool when your life is on the line.

**Viking Axe**

With our new state-of-the-art forging facility, we can now offer our customers something truly exceptional – a truly modern interpretation of the two handed Viking war axe!

The result of several years of extensive development and refinement, our Viking Axe’s long blade is not a wood cutting tool, but rather it is a finely polished and hardened spear point made from steel with a sharp cutting surface terminates in two sharp “horns”. Traditionally, the longer top point was used for stabbing or pummeling, while the slightly shorter bottom point was used by the Viking to hook an opponent’s shield or knit. Our Viking Axe is equipped with a very strong American hickory haft.

**Pole Axe**

Historically, the superior reach and armor-shattering force of the Pole Axe was the great equalizer between the common foot soldier and the terrifyingly augmented that was the Knight on horseback. Surprisingly dark in reality, Cold Steel’s Pole Axe is expertly drop forged from 1055 carbon steel. The sharp blade and sturdy hanger head are differentially heat treated, leaving the “business” ends of the Pole Axe hard, and the body a little softer to allow shock and impact. Our tough American Ash handles are then further reinforced with high treated black steel langettes. Cold Steel has created a modern monster with the power of lies which hasn’t been seen on the battlefield since the dark ages!
**Spears**

**95SC**
- Steel: Medium Carbon
- Overall: 50 cm (19.68"
- Handle: Hickory
- Thick: 2 MM (Shovel Head)
- Weight: 25.7 oz.

**Boar Spear**
- For 200 years, the boar spear reigned supreme as the hunting tool of choice in the dark forests of Europe, and made many appearances on the battlefield as well.
- Its distinctive wide leaf shaped blade and dual cutting edges cut and thrust with equal capability and the sturdy cross quillons kept danger under stress rather than breaking. The Boar Spear comes complete with a durable Secure-Ex® sheath.

**Cold Steel Samburu**
- The Samburu warrior’s throwing spear is the most advanced spear of its type on the planet. Routinely dispatching leopards, lions and even those firearm toting bandits at impressive distances!
- The Cold Steel Samburu is comprised of three distinct components:
  - The sharp shaped spear head itself, which is welded to a steel shaft.
  - The counter-balancing steel butt spike (or “shovel”) which is used as an alternative point for practice.
  - A black Hickory handle with a double taper.
- All of our Samburu spears are easily disassembled for transportation, and they all come complete with a Secure-Ex® sheath.

**Note:** We’ve also made Samburu spears to order as well. However, if you want your spear shaft on “shovel” (butt spike), it comes already straightened in a box. The transportation handle of your spear can eventually break, so please be prepared to replace it.

**Tiger Fork**
- Back in the 1990s, Cold Steel’s President Lynn C. Thompson purchased a Chinese Tiger Fork to add to his collection. He fitted it with an old rattan staff and has trained with it ever since. Lynn enjoys reading tales of hunting exploits in historical accounts and had heard stories about Chinese hunters using these giant forked tools to dispatch big cats. He also had the privilege of training with Chinese Martial Artists and studying how this tool was modified as a weapon of war.
- After 20 years, Lynn has finally brought his own version of the combative Tiger Fork to a modern audience.
- Cold Steel’s interpretation of this Martial Artist’s tool features a stout 64” Ash handle, and a carbon steel head - with an integrated central spike - to maximize its thrusting potential and assuredly turned edge to remove the warts of trapping techniques.

**Samburu Spears**
- The warriors of the semi-nomadic Samburu tribe in Kenya (known as “Lmurran”) are imposing figures never cutting their long braided hair, and decorating their faces and torsos in intricate patterns using a mixture of animal fat and red ochre. Their herds are constantly menaced by vicious predators and subject - whether four legged or otherwise! at bay!
- Inspired by the Samburu, we developed our own spears with modern materials.
- Cold Steel’s modern recreation of this classic spear is cold forged out of medium carbon SK-5 steel and heat treated to a spring temper, flexing under stress rather than breaking. The Assegai Spear comes complete with a sturdy Secure-Ex® sheath.

**Assegai**
- The spear is one of man’s oldest, reliable weapons. Early examples were no more than sticks or poles with fire hardened points, but as man learned how to keep flint cast bronze and forge metals, spears quickly evolved.
- With modern cold forging - a process pioneered by Cold Steel - we are now able to offer high performance modern spears at affordable prices.
- Our Zulu Assegai (air-uh-ghyll) are made from SK-5 medium carbon steel, heat treated and drawn to a tough spring temper, and designed to fly at the heart under impact forces rather than breaking or shattering. The Assegai blade is available with a choice of either different premium American Ash shafts (14 shorter spears for thrusting or a full length throwing shaft), and comes complete with a durable Secure-Ex® sheath.

**Special Forces Shovel**
- Cold Steel’s Special Forces Shovel is modeled after an original Soviet “Spetsnaz” military entrenching tool. This battle-hardened and effective shovel has a stout hardwood handle, a broad flat steel blade and sharp edges. A popular tool with military and special operations units worldwide, we’ve heard tell of it being used for funerals and, bunkers, to chop branches, build shelters, act as an improvised paddle, and even as a last-resort weapon of defense!
- Our Special Forces Shovel is also immensely popular with the throwing community, as its head-heavy balance and multiple sharp edges make it an excellent alternative to a tomahawk for sport and recreational throwing.
- A Cor-Ex sheath with integral belt loops is available and is sold separately.

**Tiger Fork**
- Back in the 1990s, Cold Steel’s President Lynn C. Thompson purchased a Chinese Tiger Fork to add to his collection. He fitted it with an old rattan staff and has trained with it ever since. Lynn enjoys reading tales of hunting exploits in historical accounts and had heard stories about Chinese hunters using these giant forked tools to dispatch big cats. **Man at Arms Spears**

The Man at Arms was a stalwart and dependable fighter who exhibited great martial prowess with a range of weapons. He was a capable and competent warrior who was the integral of many conflicts and was often first into the fray. Although he was not a knight, he fought and trained alongside them as a brother in arms. To honor these rugged, reliable, salt-of-the-earth warriors we have created a range of true yeomanry's weapons that we have called the Man at Arms Collection.

Each of these battle-ready pole-arms features 1065 Carbon steel and is deeply blued to a matte finish and comes complete with a premium American ash shaft.

**Maa Classic Leaf Shaped Spear**

The classic leaf shaped spear is found throughout history and across the globe. It was used for hunting and warfare for hundreds of years by many nations. The long socket gives a good deal of strength, reinforcing the central ridge of the head, while the extra wide double edged blade and stout point are amazingly effective! Our modern interpretation of the leaf shaped spear features a fully sharpened carbon steel blade with a hard spring temper and a premium American ash handle.

**Maa European Boar Spear**

Cold Steel’s European Boar Spear takes inspiration from antique Germanic hunting spears. With its broadhead, two edges and pronounced double quillons it is a high performance example of this ancient hunting tool. The European Boar Spear features a traditional shaped blade and a thick reinforcing central ridge, and is steadily quillons stop the spear from penetrating too deeply when used against dangerous game. With a premium American Ash shaft, the European Boar Spear is sure to be very popular with the hunting community and historical re-enactors alike.

**Maa European Spear**

The Cold Steel European Spear is a prime example of effective and simple design. Its design has changed very little since the Bronze Age. It is quite simply a spear done right! Every inch of this highly hunting and battlefied spear screams perfection, from its fully sharpened double edged blade to its walnut stained American Ash handle. It is a beautiful spear that is sure to have pride of place in any collection.

**Maa Lance Point**

The Lance Point was (as its name suggests) a formidable tool when used in harness. Historically it was used by German, French, Dutch and Indian cavalry troops. During our research and history we were consistently astounded by the penetrative power of the Lance Point’s hollow ground, spring tempered triangular blade. Penetration had targets with the slightest effort, it was fast, finely in hand and incredibly effective whether used from behind, up front or even thrown into appropriate targets!

**Maa Winged Spear**

The Winged Spear was a true product of the battlefield. Its blade was wide and sharp enough to almost double as a pole-ax, while its pronounced wings can be used to trap and pin an opponent’s limbs, snap his shield and parry and parry against his weapons. If you studied battlefields arts in habe a passion for historical re-enactments, we heartily recommend purchasing a Winged Spear by Cold Steel.

---

**LIVERPOOL ASSASSIN**

Our fans asked for it — and we delivered! Cold Steel is proud to introduce a new member of our “Athletics” family - the Liverpool Assassin!

Measuring 41 inches, the Liverpool Assassin is one of the biggest and heaviest Cricket Bats being commercially made on the market today. Made from high impact Polypropylene, with a flared edge and raised ridge on the spine, it is incredibly tough, unbelievably resilient – and it hits like a freight train!

**Brooklyn Series**

Ever since they first hit back in 2006, our Brooklyn Series of Baseball Bats have been consistent fan favorites! Precise injection molded out of the heaviest-grade high-impact polypropylene that we can find, they are not only stronger than most traditional bats, they are more durable too! These unimaginably strong Bats won’t rot, crack, or split or even fade! You needn’t worry about dirt affecting them either, since they’re almost impervious to the elements and clean up with little more than soap and water. Perfect for school or league games, they can be used as game bats, practice and warm-up bats or even serve as cross-over trainers to develop strength and hand/eye coordination for those studying Martial Arts. From our micro sized Souvenir Bat (the Brooklyn Shorty) to our epic over-sized Whopper, and all of the other models in between, we’re sure to have the bat for you!
**FGX NIGHTSHADE SERIES**

Made from Griv-Ex™ - the latest in fiberglass reinforced plastic - our FGX Nightshade series knives are UV and heat stabilized to make them incredibly durable. The handles of these unusual knives are made from deeply shadowed Kray-Ex™ that molded directly onto the blade. Sharp. You offer a light feel to the hand, featuring a surface that will give you a delicate and secure grip whatever the weather. Our FGX Nightshade blades are unaffected by moisture. They never rust, warp or split even in the most challenging environments. They are lightweight enough to be tied, tucked or taped just about anywhere, and, since they are unaffected by all but the most extreme heat and cold, they are a natural choice for concealed storage both inside and outside of your house - from hedges and flowerpots, to the refrigerator outside of your house - from hedges concealed storage both inside and cold, they are a natural choice for such as his mouth. The handle and ring have been precisely ground and contoured to comfortably accommodate most hands and facilitate a multitude of grip options.

**Pocket Shark**

They say “the pen is mightier than the sword” – and Cold Steel makes some mighty swords, but the Pocket Shark makes a cool personal competitor. It’s the largest, bladest, permanent moment-circle around!

The Pocket Shark is made from a high impact polymer and features walls that are 4 times thicker than conventional knives. This means it’s built for impact and will survive the nearest blows and most rigorous treatment imaginable. Plus, the screw on cap will stay in place and won’t pop off like a regular marker and look all out of your clothes. Clip it to a shirt or coat pocket, or carry in your purse, backpack or brief case. There’s simply no excuse not to own one!

**FGX Chaos**

Look smart and feel secure anywhere with our personal protection aid, the Cold Steel Honey Comb. Precision manufactured at great expense, it has the invincence appearance of a single hardbrush, but the full functionality brush also acts as a sheath that conserves an effective stiletto! Rather than metal, the Honey Comb has been injection-molded from 2x2 tough, still-nycles and fiberglass composite. We believe the Honey Comb is the all-round answer to personal defense at home, at work or everywhere. As a hardbrush it’s particularly appropriate in grooming compartments, a backpack, or a woman’s handbag, and in a surprising appearance it won’t turn heads or draw unwanted attention.

**FGX Battle Ring**

Our FGX Battle Ring is made of metal, rather than precision injection molded from 2x2 tough, still-nycles and fiberglass composite. It has a tough 3 1/2" long, single edge, single point blade and an 1/2" thick, true form cross section that tapers to a fine point.

**FGX Battle Ring**

Our FGX Battle Ring has a distinctive short, broad charge blade with a sharp point that re-emulates a shark’s tooth. The handle and ring have been precisely ground and contoured to comfortably accommodate most hands and facilitate a multitude of grip options.

**FGX BIG TIRE BOSS**

The Cold Steel Tire Boss is available in two sizes. A lightweight 20" model and a heavier duty 24" model. Compact and easy to store in your car or truck, the Tire Boss is a handy companion for long distance driving, where it can be used to give you confidence and peace of mind - by periodically checking your tire pressure and keeping you and your passengers or cargo safe. Made from precision injection molded high impact polypropylene, the Tire Boss is durable, weather resistant and built to last!
**Battle Shades**

Back in 1980, Cold Steel’s first customers were Military and Law Enforcement professionals - and what they valued most was our unwavering commitment to strength. With that strength in turn, came safety, and we have been pioneering research and development in this field ever since. From day one, many of our products had been specially developed for warriors. So when we began to explore eye wear solutions, we went beyond just “sunglasses” and developed Battle Shades!

From boardroom to battlefield, Battle Shades have been created for maximum comfort and security. Their sleek, low profile and ergonomic frames, are remarkably light and comfortable, with integrated soft temple tips and vented paths to air circulation, as well as to increase comfort on typical “hot spots” that occur from prolonged wear. Our MIL-Spec high impact polycarbonate lenses not only offer 100% UV (A, B & C) protection, but also meet the Military Standard impact resistance rating M4, offering superior coverage and protection in the field. For added safety and peace of mind, we have added our innovative protective shields to selected models in our line-up. These fully removable shields give additional protection from the distraction (and potential injury) of wind shear, or born debris and glare, keeping you focused, alert and ready for action!

**Battle Shades Mark III Low-Pro Series**

These sleek, lightweight additions to our Battle Shades series are slightly reduced in scale with a sleeker profile. They are lighter than our conventional models and perfect for individuals with smaller heads or thinner faces. Available in matte or gloss black, both of these low profile stylish sunglasses are polarized for reduced glare and increased visibility.

**Selected Models**

- **EW31MP Mark III (Gloss Black)**
  - Black Nose pads, Black Temple Tips, Black Lens, Black Side Shields
- **EW31MP Mark III (Matte Black)**
  - Black Nose pads, Black Temple Tips, Black Lens, Black Side Shields

**“Sunglasses” and developed Battle Shades!**

- Black Nose pads, Black Temple Tips, Black Lens, Grey Lens, Black Side Shields

**EW31MP Mark III  (Matte Black Low-Pro)**

- Black Nose pads, Black Temple Tips, Black Lens, Black Side Shields

Each of our Battle Shades comes complete with a soft microfiber pouch and a durable carry case. The case features a discreet internal pocket for carrying a knife, mint wrangler or even just your money clip or an integrated snap-fit loops so you can carry your Battle Shades on a belt or pack. Available in a variety of styles, our innovative protective shields to selected models in our line-up. These fully removable shields give additional protection from the distraction (and potential injury) of wind shear, or born debris and glare, keeping you focused, alert and ready for action!

For decades now Cold Steel President Lynn C. Thompson has spent any of his rare “down time” traveling the world product testing while hunting and fishing. On these exotic excursions, he not only processes the game he kills (which is donated to local communities) but he spends all the time he can spare talking to every butcher, fisherman, hunter or chef he can find in a constant search for new ideas, information or “tricks of the trade”.

Our new Commercial Series is the culmination of all those years of accumulated knowledge. Lynn has developed a huge range of versatile blades for commercial users and professionals. From slaughterhouses and butchers, commercial kitchens and chefs to hunters and fishermen, there are blades for everyone!

Each knife is made from razor sharp cryo-quenched German 4116 Steel, for ease of re-sharpening at work or in the field. Their handles feature a stiff Zy-Ex™ core on the inside for durability, with a softer, food-safe Kray-Ex™ exterior providing a comfortable non-slip grip for hours of use.

For commercial customers, this series includes:

- **20VBBFz** FlExible BoNiNG kNiFE
  - Weight: 3.7 oz.
  - Thick: 1.75 MM
  - Blade: 6"
  - Overall: 11 1/4"

- **20VBBz** StiFF BoNiNG kNiFE
  - Weight: 4.4 oz.
  - Thick: 3MM
  - Blade: 6"
  - Overall: 11 1/4"

- **20VBCFz** FlExible Curved BoNiNG kNiFE
  - Weight: 3.6 oz.
  - Thick: 1.75 MM
  - Blade: 6"
  - Overall: 11 1/4"

- **20VBCz** StiFF Curved BoNiNG kNiFE
  - Weight: 4.3 oz.
  - Thick: 3MM
  - Blade: 6"

The 6" and 8" Fillet Knives and the Western Hunter come complete with a Secure-Ex™ Sheath.
The Cold Steel .357 Magnum Blowgun offers hours of fun in a super lightweight, budget friendly package! The .357 Magnum Blowgun is a toy, true, and equally at home hunting small game or target shooting with family and friends. Made from durable high grade aluminum with a .625 rubber mouthpiece, quiver and hand guard – they are much more durable and accurate than many of the novelty “toy” blowguns on the market today, while remaining small, lightweight and inexpensive enough for beginners or younger users.

Each blowgun comes complete with spear point and stun darts as well as a rubber ferrule so you can use it as a walking stick as well!

Our Professional .625 Blowgun comes with a target style mouthpiece and a 3mm thick barrel. This means it is almost twice as thick and 45% heavier than our standard models making it the heaviest commercially made Blowgun in the world!

But the real reason you should shell out the extra dough for it is the huge increase in accuracy afforded by its substantially more rigid barrel.

This signature special edition blowgun was built to Tim’s exact specifications. It features a newly designed grip with integral mouthpiece and hand guard for extra comfort both when shooting the Blowgun and using it as a hiking staff. A secondary rubber fore-end provides increased hold and stability when making precision shots. Easily disassembled for storage and carry, the new Wells Signature edition blowgun is a must for any hunter!

While Tim is best known for his line on countless award winning Pursuit will attest, he has summoned the nerve and put the skill of a bow hunter to dispatch prey all over the world. This signature special edition Blowgun was built to Tim’s exact specifications. Pursuit will attest, he has summoned the nerve and put the skill of a bow hunter to dispatch prey all over the world.
**Kitchen Classics**

The Cold Steel Kitchen Classics series feature high performance razor edged, cryo-quenched and precision flat ground German 4116 steel blades for exceptional cutting performance. All models in the series come with a razor sharp edge that lasts and lasts, and some have serrated edges uniquely appropriate to the tasks they were designed to do.

Our Kitchen Classics are available for purchase as single items, or as a complete set. The set includes an attractive oak counter-top stand, one of each of the knives shown here, and six steak knives.

**Boning Knife**

*Boning Knife* 59kSBNz

- **Overall:** 10 7/8”
- **Blade:** 6”
- **Thickness:** 2MM
- **Weight:** 2.6 oz.

**Improving Kitchen Classics series is better than ever!**

More comfortable, convenient and secure in hand, and delightfully easy to clean – the new and improved Kitchen Classics series is better than ever!

The Kitchen Classics feature a newly re-designed handle that must be felt to be appreciated! Featuring a stiff Zy-Ex™ core on the inside for durability, with a softer, food-safe Kray-Ex™ exterior for the kind of non-slip grip that must be felt to be appreciated.

- **Weight:** 31 oz.

**Improved Boomerang**

The non-venting boomerang, or a variation of the throwing club, has been used as a hunting tool on every continent from time immemorial, and is still found in isolated pockets around the globe today. Followed in various shapes, forms and sizes, and made from wood, bone, horn, and even metal, it was most effective when used to harvest birds and small game. Since we are in the business of making things to throw, it was only natural for us to try and improve on the classic hunting boomerang by making our own version:

Injected molded from high impact Polypropylene with an attractive wood grain texture, you can use our Boomerang for hunting and sport throwing. It is a great gift, and years of fun.

**Gunstock War Club**

Cold Steel is proud to introduce our modern interpretation of the culturally significant Gunstock War Club. In the early sixteenth century, American Indians observed the potential of a rifle stock as a bludgeoning weapon, and they wasted no time in fashioning their own war clubs based upon its basic shape.

Mode of straight grain hard woods, they hit with remarkable force, especially when enhanced by the addition of a short blade. Designed by custom Bladesmith Rich McDonald; Cold Steel’s version of this fascinating tool incorporates many of the features found on historical examples, including the ridged centerline, sharp point, and the classic “Fawn’s Foot” handle, features found on historical examples, including the ridged centerline, sharp point, and the classic “Fawn’s Foot” handle.

Boomerangs are cast in various materials and sizes. This one is designed for hunting and sport throwing. It is a great gift, and years of fun.

**Indian War Club**

Cold Steel President Lynn C. Thompson is an avid collector of wooden weaponry and ethnic arts, and when he saw a beautiful example of a Ball Headed War Club made by custom Bladesmith Rich McDonald, he jumped at the chance to work with Rich to reproduce it for a modern audience. Cold Steel’s Indian War Club is injection molded from a weatherproof high impact polymer material that is virtually impervious to impact. This material is highly resistant to shock. The surface has a realistic wood grain texture, which can easily be painted to replicate the finish of wooden versions. Each club is approximately 2 ft. long with a 3 1/4” diameter ball head, and fitted with a removable blunt steel stud. For historical re-enactment the surface has smokeless wood grain finish that can be easily painted and customized with brass studs, tacks, or feathers.
Machetes

Kukri Machetes

There are very few knives in the world that we can think of that can cut through anything with such ease. The Kukri is one of them. It’s true that some of the better Kukris (like our Gurkha model) can be extremely expensive, but they’re so effective that you can’t help but recommend them to anyone who needs a knife that will get the job done. Available in two sizes (one with a thicker blade and one with a thinner blade) our Kukri Machetes are those workhorses that are built to handle the toughest jobs.

Kukri Plus Machete

The Cold Steel Kukri Plus Machete features the same wide, curved blade that makes our Kukris such a dependable tool for delivering the kind of performance that the users of many swords and bushcraft tools, but with the addition of an integral solid steel guard for added protection and safety. Its full tang is completely encapsulated in a comfortable and durable polypropylene handle that has been ergonomically designed for comfort and safety, allowing you to keep a secure grip on the Machete even in the most inclement conditions. Featuring a rust resistant blade made from stainless steel, it’s fully sharpened and ready for action.

Royal Kukri Machete

It’s hard to find a more versatile knife than a Kukri. A saber-slit in a right angle and an indomitable curved handle, it’s a true stalwart of any tool kit. Our Royal Kukri Machete presents the blade’s keen point at a new, non-traditional angle, keeping the cutting power that made the Kukri the stuff of legend, but increasing its thrusting and piercing power. The handle, with its integral guard keeps the user’s precious fingers safe from harm while improving the balance and heft of the knife. Proven to be an outstanding performance tool, the Royal Kukri Machete is capable of the toughest bushcraft chores. It’s fully sharpened 1055 Carbon Steel blade is blade is safely and securely carried in a sturdy Cordura® sheath.

Heavy Machete

The Heavy Machete, as its name suggests, is one of the heaviest models in our lineup. The stout 1055 Carbon Steel blade is designed for sheer cutting and chopping power in any environment! The European style slanted tip packs explosive performance - combining precision cutting, with weight-forward head-heavy chopping power - while the organic polypropylene handle makes it comfortable to use all day, even when working in the toughest terrain.

Slant Tip Machete

Like our heavier All Terrain Chopper Machete, the Slant Tip Machete is designed for shear cutting and chopping power in any environment! The extra-long handle on our Two Handed Machete is designed to accommodate two hands as well. The 21 inch Lathe styled blade has the potential to make delicate, precise cuts in tight quarters as well as deliver limb-lopping strikes. If you like the look and feel of traditional Lathe machetes, we’re sure you’re going to love the extra horsepower available in our Two Handed model!

Panga Machete

The Panga is an excellent choice for cutting thick brush and chopping down saplings. This versatile machine is light and well-balanced, making it a capable agricultural tool as well as a hunting and survival blade.

Bolo Machete

Still popular throughout Asia and Pacific Rim, the Bolo Machete features a wide blade that shifts its weight forward, making it capable of excellent work when heavy chopping or slashing is required.

D-Guard Latin Machetes

These hybrid machetes combine the amazing cutting power of the Latin Machete with the incomparable hand protection of our Cutlass Machete. The thick solid steel tang runs all the way through the D-ring guard to give a safe and secure grip, and the entire handle is fully encased in tough, durable and weatherproof injection molded polypropylene.

All Terrain Chopper

In our grueling performance tests, the ATC (All Terrain Chopper) outperformed many Machetes, and even put some swords to shame! The sheer cutting potential harnessed within the ATC’s extra wide blade just has to be seen to be believed! Worn either slung over the shoulder or across the back in its weight-distributing carry sheath, the ATC is surprisingly comfortable even when carried for extended periods of time. Following exhaustive field tests, we found the ATC to be a stalwart hunting and wilderness survival companion. Much more than just a machete, and the best thing to use in a kit, it guided countless chopping power into an easy to carry package, delivering superb performance.

Two Handed Latin Machete

The extra-long handle on our Two Handed Latin Machetes can still easily be used one-handed, but will comfortably accommodate two hands as well. The 21 inch Lathe styled blade has the potential to make delicate, precise cuts in tight quarters as well as deliver limb-lopping strikes. If you like the look and feel of traditional Lathe machetes, we’re sure you’re going to love the extra horsepower available in our Two Handed model!
Machetes

Thai Machete
The Thai Machete represents the culmination of over 4 years of development and refinement. Like the Thai swords that inspired it, our Machete is beautifully balanced, with a keen cutting edge and a sharp tip. Though most commonly seen in pairs when phenomena Thai fighting arts, these long curved blades are amazingly versatile. Light enough to swing one-handed, but with a long enough handle to employ a two-handed grip for extra power and a cutting point. The Thai Machete’s wide blade and curved cutting edge make it an excellent brush cutter. Stinging vines, vines and light foliage with ease. Its fully sharpened blade is made from heat treated 1055 Carbon Steel. As the other blades in our incredibly popular Machete line up, Thai Machetes comes complete with a Cor-Ex sheath for carry and storage.

Black Bear Bowie
Continuing our ground breaking tradition for creating unusual and eye-catching “tactical machetes”, our full tang derived a bold new blade for 2017 – the Black Bear Bowie! It’s extra wide, 12” long blade is black powder coated with a matte-black corrosion resistant finish and fully sharpened right here at Cold Steel HQ. The Black Bear Bowie’s generous full tang and solid steel guard are completely injection over-molded with fine-textured high-impact Polypropylene, creating a very comfortable but tough, weatherproof grip. Supplied with a sturdy Cor-Ex sheath for ease of carry and convenience of use in the field, the Black Bear Bowie is fast and lively in the hand, and wide enough to chop through small vines and saplings, clear brush and perform admirably in many survival or bushcraft duties. If you are looking for a truly epic bowie knife, but at an affordable price, then you will be hard pressed to find something better than the new Cold Steel Black Bear Bowie!

Smatchet
Cold Steel is proud to provide our modern machete-styled interpretation of a classic World War II Smatchet. Famed for its countless exploits in the trenches and in the jungle, the Smatchet carved out a reputation for effectiveness that still echoes today. The Smatchet was all about function. Nothing having a Smatchet instilled confidence and a grim determination for getting the job done. Its very name became a byword for guts, glory and bravery. Our modern interpretation of this military classic features the same broad spear point and false edge with the addition of a strong steel-reinforced guard and rugged weatherproof handle. A formidable tool that can only be described as part machete, part short sword, our Smatchet is fully sharpened, and coated with a baked-on rust-resistant matte finish.

Cutlass Machete
Inspired by our popular 1917 Cutlass, our Cutlass Machete features a stiff 1055 Carbon steel blade that is capable of repelling bowies as in for hacking a path through the brush so you can get to your favorite fishing hole! A Barong inspired Machete features a beautifully curved 18 inch leaf-shaped blade made from 1055 Carbon Steel with a baked on, matte black finish to aid in rust and corrosion resistance. Its traditionally influenced down-turned blade make it an excellent weapon during wartime. The Smatchet was all about function. Nothing having a Smatchet instilled confidence and a grim determination for getting the job done. Its very name became a byword for guts, glory and bravery. Our modern interpretation of this military classic features the same broad spear point and false edge with the addition of a strong steel-reinforced guard and rugged weatherproof handle. A formidable tool that can only be described as part machete, part short sword, our Smatchet is fully sharpened, and coated with a baked-on rust-resistant matte finish.

Barong Machete
Inspired by the Barong, the national sword of the Philippines, our Barong Machete features a wide, deeply curved blade and tough one-piece full tang construction with over molded polypropylene handles for maximum durability. Plasma cut from expertly heat treated 1055 Carbon steel and then hand ground and sharpened here at our Cold Steel HQ in Ventura CA, the Chinese Sword Machete has amazing cutting power. Supplied with a Cor-Ex back sheath, this beast of a machete will actually out perform many swords on the marked and at a fraction of the cost!

Chinese Sword Machete
Cold Steel’s historically inspired sword machete hybrids are firm fan favorites. The Chinese Sword Machete is no exception! Similar in look and design to our record breaking Chinese Sword, the Chinese Sword Machete is a super wide, deeply curved blade and tough one-piece full tang construction with over molded polypropylene handles for maximum durability. Plasma cut from expertly heat treated 1055 Carbon steel and then hand ground and sharpened here at our Cold Steel HQ in Ventura CA, the Chinese Sword Machete has amazing cutting power. Supplied with a Cor-Ex back sheath, this beast of a machete will actually out perform many swords on the marked and at a fraction of the cost!

Tactical Series Machetes
Our Tactical Series of machetes are inspired by our hugely popular and record breaking Warrior Series of Tanto, Wakizashi and Katana. Available in 3 sizes, each of these fun and distinctive machetes features a wide, curved Tanto point blade and solid steel truncheon made from heat treated 1055 High Carbon Steel with a baked on anti-rust coating. Three broad flanking are injection over-molded with high impact polypropylene, making them incredibly durable and weather resistant. We re-created the look of a traditional cord wrapped handle, Fish and Knife but send modern materials that will not shrink, warp, taint or rot and require very little maintenance. Sharpened right here in our Ventura HQ, each of these Machetes comes complete with a Cor-Ex sheath for carry and storage.

Japanese Black Bear Bowie
Built upon the popular Black Bear Bowie, the Japanese Black Bear Bowie is much longer with a 22” blade. The blade is black powder coated with a matte-black corrosion resistant finish and is fully sharpened right here at Cold Steel HQ. The Japanese Black Bear Bowie’s generous full tang and solid steel guard are completely injection over-molded with fine-textured high-impact Polypropylene, creating a very comfortable but tough, weatherproof grip. Supplied with a sturdy Cor-Ex sheath for ease of carry and convenience of use in the field, the Japanese Black Bear Bowie is fast and lively in the hand, and wide enough to chop through small vines and saplings, clear brush and perform admirably in many survival or bushcraft duties. If you are looking for a truly epic bowie knife, but at an affordable price, then you will be hard pressed to find something better than the new Cold Steel Japanese Black Bear Bowie! 

Tactical WaniZashi Machete
Standard in look and design to our record breaking WaniZashi Sword, the WaniZashi Sword Machete is a super wide, deeply curved blade and tough one-piece full tang construction with over molded polypropylene handles for maximum durability. Plasma cut from expertly heat treated 1055 Carbon steel and then hand ground and sharpened here at our Cold Steel HQ in Ventura CA, the WaniZashi Sword Machete has amazing cutting power. Supplied with a Cor-Ex back sheath, this beast of a machete will actually out perform many swords on the marked and at a fraction of the cost!

Tactical Tanto Machete
Inspired by our hugely popular and record breaking Warrior Series of Tanto, Wakizashi and Katana. Available in 3 sizes, each of these fun and distinctive machetes features a wide, curved Tanto point blade and solid steel truncheon made from heat treated 1055 High Carbon Steel with a baked on anti-rust coating. Three broad flanking are injection over-molded with high impact polypropylene, making them incredibly durable and weather resistant. We re-created the look of a traditional cord wrapped handle, Fish and Knife but send modern materials that will not shrink, warp, taint or rot and require very little maintenance. Sharpened right here in our Ventura HQ, each of these Machetes comes complete with a Cor-Ex sheath for carry and storage.
**Bowie Machete**

Cold Steel's Bowie Machete is fast, and lively in the hand, making it an outstanding slashing blade and an adorable chopper while still retaining knife-like capabilities when a smaller harder blade is required. The Bowie Machete is supplied fully sharpened, with a tough, baked-on matte black non-reflective coating and is equipped with a sturdy Cor-Ex sheath.

Made from spring tempered 1055 Carbon steel, the Cold Steel Bowie Machete is incredibly tough. With the weight-forward balance necessary to chop through vines, saplings, brush and other obstructions, the Bowie Machete is one of the best values for the outdoorsman.

- **THICKNESS**: 2.8 MM
- **WEIGHT**: 27.2 oz.
- **OVERALL**: 32 1/2"
- **BLADE**: 12"

**Tanto Machete**

We've prototyped a whole host of different short bladed Tanto Machete shapes over the years, but the Tanto Machete remains one of the best we've ever attempted. Although the "Americanized Tanto" is known primarily for its combative application, it also makes an excellent multi-purpose bush craft blade.

The Cold Steel Tanto Machete is sold fully sharpened, and shipped with a quick study in economy of motion. By slightly bending your knees and leisurely swinging the machete with a back and forth motion, you can make short work of many cutting tasks. Use it as a chopper while still retaining knife-like capabilities when a smaller harder blade is required.

- **THICKNESS**: 2 MM
- **WEIGHT**: 16 oz.
- **OVERALL**: 18 5/8"
- **BLADE**: 16" (97TBMZ)

**Gardens & Camp Machete**

The Garden & Camp Machete represents Cold Steel's interpretation of a much used African agricultural tool. Incredibly intuitive to use, the Garden & Camp Machete is a quick study in economy of motion. By slightly bending your knees and leisurely swinging the machete with a back and forth motion, you can make short work of many cutting tasks. Similar to the grass and weeds from your garden, or as a lightweight and handy cutting tool to brush back from camp sites, hunting blinds and waterfronts. Short, as a powder in many areas to look for obstructions, obstacles or varmints. Its short, sharp and long double edge blade is lightweight and a breeze to carry and use all day.

Made from spring tempered 1055 Carbon steel and hard wearing weather-resistant polypropylene handle only adds to its durability and functionality.

- **THICKNESS**: 2.8 MM
- **WEIGHT**: 16.2 oz.
- **OVERALL**: 26"
- **BLADE**: 26" (97BMZ)

**Gladius Machete**

The Gladius Machete comes complete with a sturdy Cor-Exª sheath and belt loop for easy of carry and use. The Gladius Machete is fast, and lively in the hand, making it an outstanding slashing blade and an admirable "intermediate impact tool". Law enforcement professionals often face a perplexing dilemma when contemplating employing fist or baton blows. Blows struck with a baton may be too powerful resulting in grave injury. One solution however, is the Koga SD - bridging the gap between a fist and baton blow.

Frequently made from Lignum Vitae, an incredibly heavy and dense hardwood, these Truncheons were employed with devastating effect. Truncheons have a colorful history, and techniques often included thrusting jabbing strikes, striking strokes, and point manipulations and locks, but these were often abandoned in favor of simply "shockering" an opponent with a heavy strike to the head.

- **THICKNESS**: 1 1/4"
- **WEIGHT**: 16 oz.
- **OVERALL**: 26"

**Jungle Machete**

Made from spring tempered 1055 Carbon steel, the Cold Steel Jungle Machete is incredibly tough. With the weight forward balance necessary to chop through vines, saplings, brush and other obstructions, the Jungle Machete is sold fully sharpened, and shipped with a sturdy Cor-Exª sheath and belt loop for easy of carry and use.

- **THICKNESS**: 2.8 MM
- **WEIGHT**: 18.1 oz.
- **OVERALL**: 32 1/2"
- **BLADE**: 16" (97SMZ)

**Koga SD Series**

The late Bob Koga remains an icon in the world of self-defense and law enforcement. As a force Vietnam and LAPD Officer, with extensive Martial Arts training in Judo, Wrestling, Ju Jitsu, Jo Do and Aikido, he became an outspoken proponent of the merits of the straight baton as opposed to the PR24 or side handle baton. The Cold Steel Koga SD Series were made of a high impact polymer, and are designed to function as an aid in leverage when restraining an individual, and obtaining joint locks or submission holds. But they also serve as an admirable "intermediate impact tool".

Law enforcement professionals often face a perplexing dilemma when contemplating employing fist or baton blows. Blows struck with the fist may be too weak, or too strong, and techniques often included thrusting jabbing strikes, striking strokes, and point manipulations and locks, but these were often abandoned in favor of simply "shockering" an opponent with a heavy strike to the head.

We've been asked many times over the years to produce our own series of impact tools for law enforcement, and these new Police Batons are our answer to those requests. We are grateful for the valuable help and support of the law enforcement and military specialists who were involved heavily in the extensive research and development of these tools.

We also want to extend our special thanks to Guro Ron Balicki – an internationally acclaimed Martial Artist, who teaches stick and baton techniques to the French Anti-Terrorist Team "RAID" – whose insight into the tactics and application of the baton for the Special Forces were invaluable in our design process.

- **THICKNESS**: 1 1/5"
- **WEIGHT**: 6 oz.
- **OVERALL**: 26"

**Police Baton**

Cold Steel's Police Batons are made from injection molded high impact polymer pylons with thick rubber resting stopper for ease of carry. Available in standard plain configuration or ribbed for extra retention when wearing gloves, these hard wearing tools are designed for maximum performance in all conditions – plus, they won't crack, warp or lose their traditional wooden handles.

Our earliest supporters were law enforcement and law enforcement professionals, and many of our products over the last three and a half decades have reflected our respect and admiration for the "sharper" of the world – who put themselves in harm's way and walk toward danger each day.

Axe Gang and Trench Hawk trainers: Supplement your training with hard-wearing replicas of our two most popular designs. The Axe Gang trainer and the Trench Hawk training tools both closely duplicate the feel and size of their sharp counterparts, while being considerably safer to train with!

Polypropylene swords: Martial Artists have known a simple truth for ages – if your sharp training tools cannot, won’t chip, splinter or could not be used in all weather conditions. Cold Steel’s solution to these dilemmas was to design a line of synthetic polymer substitutes.

Medieval buckler: The Buckler is a small historically inspired shield about the size of a large dinner plate. Cold Steel’s study training replica has a thick,sound butt to protect the hand, and a flagged handle that will withstand plenty of use. Highly popular with HEMA practitioners and historical reenactors.

Steel training saber: A pair of much-used and worn “Hutton Style” military sabers has been in our Cold Steel Salle D’Armes for nearly 15 years. Lynn Thompson, Luke LaFontaine and Anthony DeLongis have trained with them weekly for years, and now, we have finally brought to our own interpretation of this excellent training tool to the market. Our Steel Training Saber is deeply curved and fullered, blunted for training and with a fingernail spring temper for practice and sparing. Its substantial pierced steel guard has reinforced rolled edges for extra durability, and it tightly wrapped leather grip will offer years of use as a dedicated training tool. Super lightweight, strong and perfectly balanced, this is a must-have training tool for any historical fencer or HEMA practitioner!

Training staff: Thanks to pioneering innovations in the field of high-strength polymeric production technology, Cold Steel is proud to offer this first synthetic staff with the words of company President Lynn C. Thompson that “it’s a hard wearing replica of the traditional style.” Japanese staff was an excellent training tool for cross training across multiple Martial Arts disciplines. For peripheral work and for conditioning training, this high impact staff will make an excellent addition to any Martial Artist training regimen!

Japanese styled training swords: Our Japanese training swords are closely modeled after our world famous Warrior series swords. Their wide blades imitate the flowing lines of our Warrior variants, but they are made from super tough polypropylene with no sharp edges or points so they are perfect for armored sparring, training, conditioning drills and “cold work.” Each model also features an intricately detailed imitation cord wrap grip, offering supreme control even when wearing heavy armor. Our Training Swords offer superior heavy-duty training potential for the modern Martial Artist.

Training Saber: The Training Saber comes complete with a steel scabbard with carrying rings.
Cold Steel’s Training Firearms are perfect for use by Military & Law Enforcement personnel, Personal Protection and Security Professionals, and civilian Martial Artists.

Made from ultra-durable thermoplastic rubber, they are stiff enough to train drawing techniques from the holster and disarming techniques in close quarter training, but just soft enough to use in hand-to-hand striking situations with relative safety. Strong enough to survive hours of training, but inexpensive enough to outfit even an entire gym of students without breaking the bank, these practical and tactical training aids are based on some of the most popular firearms in America today - but their bright coloration makes it unlikely that they would be ever mistaken for a real handgun!

### Rubber Trainers

Now you can practice with some of our most popular knife designs in relative safety - with our rubber training knives!

Each trainer has been carefully fashioned to look as realistic as possible so they can be effectively used in solo practice, training drills, disarm drills, and demonstrations and any other activity where you want a reasonably close approximation of realism but not the extreme danger and risk associated with an actual knife.

**A**
- **Rubber Training Peace Keeper I**
  - Weight: 3 oz.
  - Length: 12 in.
  - Blade: 7 in.

**Training Firearms**

Cold Steel’s Training Firearms are perfect for use by Military & Law Enforcement personnel, Personal Protection and Security Professionals, and civilian Martial Artists.

Made from ultra-durable thermoplastic rubber, they are stiff enough to train drawing techniques from the holster and disarming techniques in close quarter training, but just soft enough to use in hand-to-hand striking situations with relative safety. Strong enough to survive hours of training, but inexpensive enough to outfit even an entire gym of students without breaking the bank, these bright coloration makes it unlikely that they would be ever mistaken for a real handgun!
The Cold Steel Axe Head Cane is made from incredibly durable and highly impact resistant high-impact Polypropylene, assuring impressive strength and durability as well as weather-resistance. The level of detail is astonishing, with scales running the full length of the undulating shaft, and a humorous visage with snarling fangs, it is an eye-catching stick you'll be proud to carry and use. It is fashioned from the highest grade high-impact Polypropylene, ensuring impressive strength and durability as well as weather-resistance. The latest incarnation of this popular design is made from incredibly durable and highly impact resistant high-impact Polypropylene. Unlike wood, it is extremely weather resistant, and withstands inclement conditions that would cause a conventional stick to crack, warp or rot.

**African Walking Stick**

Our President, Lynn C. Thompson has spent a lifetime collecting walking sticks and wooden weapons, and has amassed quite a collection of three beautiful handmade sticks. He has always had a particular fondness for the Knob Kerrie, a ball-headed walking stick from Africa. Our interpretation of this African Walking Stick features some of the finest features of the traditional Zulu Kerrie – the undulating shaft, and distinctive geometric ball - but instead of using expensive exotic hardwoods, we've made ours out of high-impact Polypropylene. This means that, in addition to being incredibly durable, it won't rot, warp, crack, splinter, split, shrink, mildew or fade. Although its primary function will always be as a walking stick to aid one's balance when crossing uneven, slippery, uneven and treacherous terrain, a walking stick is so much more than just an aid to stability for the injured, ill or infirm. As any hiker or outdoorsman will tell you, it's also an excellent tool for traversing rough, slippery, uneven and treacherous terrain, a useful pointer or probe – and in dire straits it makes a capable self-defense option!

**City Sticks**

These classy walking sticks are just as at home at the opera as they are in a stroll through the urban jungle! Our City Sticks are made out of eleven layers of super-tough fiberglass which, in our impact tests, proved to be astonishingly durable. Our City Sticks are topped with a mirror polished 6061 Aluminum head. Choose between the classic standard "scent stopper" head, or our polished style - which is designed to fit ones head like a 17th century pistol butt. Both heads are also removable so that they can be easily engraved or modified to suit your tastes. The base of each of our City Sticks are fitted with a thick, rubber non-slip ferrule.

**Ax Head Cane**

The Cold Steel Axe Head Cane is a direct response to our beloved fans, friends and customers. For years now we have been asked to bring out our very own crook-top walking stick. Well, we listened – and we haven't been disappointed! The Axe Head Cane represents the culmination of years of design and development. Combining our own study of the combative use of the traditional Zulu Kerrie – the undulating shaft, and distinctive geometric ball - but instead of using expensive exotic hardwoods, we've made ours out of high-impact Polypropylene, the Axe Head Cane will withstand even the harshest weather conditions and will never crack, warp or rot like a conventional wooden stick.

**Lucky Dragon Walking Stick**

Our Lucky Dragon Walking Stick has become one of the most popular sticks in our line-up. In China, red is a popular color during New Year and other holidays, and it is often used to signify that something is lucky or capable of bringing good fortune. We are proud to add this new vibrant new lucky red Dragon to our collection!
**Blackthorn Series**

Our Blackthorn sticks are built for strength and durability out of high impact polypropylene. Unlike wooden sticks found in nature, ours will not warp, crack, rot, or splinter. They are hand-crafted from the finest materials available to ensure that you receive the highest quality product possible. Made from a unique combination of materials, our Blackthorn Walking Stick is truly one-of-a-kind. It is incredibly durable, and is easy to clean with a little soap and water.

**Blackthorn Staff**

Inspired by an over-sized staff in the private collection of our company President Lynn C. Thompson, our newest member of the Blackthorn family is the largest stick we’ve ever made! The new Blackthorn Staff (almost 5 feet long) represents the culmination of years of costly research and development in the world of impact polypropylene and high-impact plastic production. The lightweight, strong staff with its rustic wood-effect texturing “clipped them” modulus and polished-faux-wood grain is sure to be an unusual and much talked about part of any collection.

**Blackthorn Walking Stick**

The Blackthorn is found throughout Ireland and the British Isles, and it has been prized for centuries as a material for premium walking sticks. The most well-known incarnation of the classic Blackthorn stick was the Irish Shillelagh—a tool that was so fearsome in trained hands that the English outlawed it! To circumvent this law, the Irish modified the Shillelagh into the classic walking stick that we are familiar with today. Cold Steel’s modern interpretation of this beautiful and historically significant walking stick is made from high impact polypropylene. It’s incredibly durable, and is easy to clean with a little soap and water.

**Blackthorn Shillelagh**

Cold Steel’s Irish Blackthorn Walking Stick has been a firm fan favorite since its inception. Its good looks, combined with its hard-wearing materials have made it an often imitated, but never equaled classic! Now, we are proud to add a “little brother” to our line-up. A shorter, modifed version of our Classic Blackthorn Walking Stick is sure to be a hit with anyone looking for a walking stick that is lightweight and easy to carry.

**THE FIGHTING SABONG**

World renowned Martial Artist Guro Ron Balicki provides a fascinating and informative look at the Indonesian and Filipino art of “The Fighting Sabong”. Ron Balicki’s video on the flexible weapons of the sabong and making is educational and informative as well as entertaining.

**THE FIGHTING TOMAHAWK**

Tomahawks, in many variations, have seen service in many armed conflicts in our nation’s history! Cold Steel is proud to present an instructional DVD series exploring the versatility of the Tomahawk and its many combative applications.

---

**Training Videos**

**Fighting With the Saber and Cutlass**

This fascinating DVD series has been designed as a serious, straightforward, and focused course dealing solely with the combative applications of the saber and cutlass. This instructional series begins with detailed instruction outlining how to operate an apparatus with a similar comparable weapon. This is the best way to build the necessary fundamental skills and techniques to allow the viewer progress to embellishing and graphing with a saber.

**Conversational Topics:**

- Simple Parry
- Greater Parry
- Turn
- Overhand Thrust
- Underhand Thrust
- Hitting with the glove
- Blocking with the glove
- The Saber Footwork

**Bonus:** Guro Dan Inosanto teaches basic techniques.

**The Fighting Tomahawk**

Tomahawks, in many variations, have seen service in many armed conflicts in our nation’s history! Cold Steel is proud to present an instructional DVD series exploring the versatility of the Tomahawk and its many combative applications.

**Conversational Topics:**

- Advantages as a weapon
- Customizing your Tomahawk
- Specialized training: Safety
- Scrimming methods
- Disarm defense
- Fighting stances and Features: Throwing, spinning, hammering, picking, and swinging
- Fighting, cutting, stabbing, and hacking
- Blocking, parrying, and using the empty hand
- Sparring drills, actual fighting
- BOONUS: Opposing other weapons

Two Disc DVD Set: Approx. 4 1/2 hrs.

- Focus Drills & Head Protection
- Focus Drills & Head Protection
- Focus Drills & Head Protection

**FILIPINO BOXING**

Learn traditional Filipino boxing using empty hands instead of gloves. Developed during the heyday of bare-knuckle boxing, Filipino Boxing (Pekongkut) has confounded the traditional “western style” boxer for more than a century. It is because it is not just a left-right combination of Filipino Boxing teaches you how to use your whole body to overpower, saddap or defeat an attacker.

Whether you’re a novice or experienced fighter, this series has something for you! Renowned Filipino Martial Artist Guro Ron Balicki presents:

- Bas-En Garde Stances
- Footwork Methods and Drills
- Different Fighting Methods, Including Non-Contact Long Range Sparring
- Multiple Kicking, Kneeing and Elbow Techniques
- Basic to Advanced Defense with special emphasis on attacking and destroying incoming punches and kicks using fists, elbows, knees and feet!
- Filipino Thrusting Drills: Single Hand & Double Hand
- Multiple Kicking Drills
- Filipino Wrestling and Submission Grappling
- Joan Fan Jeet Kune Do

Three Disc DVD Set: Approx. 5 1/2 hrs.
**The Warrior’s Edge**

Combining techniques gleaned from years of experience in Western fencing, Lawrence E. Cottone, Robert Baldwin / Joanna’s lineage Fighting Martial Arts, Japanese Ken Jitsu, and Western Boxing, The Warrior’s Edge is Lynn C. Thompson’s first instructional DVD series on the principles of knife fighting.

**Covering:**
- Types of Knives
- Guards
- Training Tools
- Grip
- Ken Jitsu Stances
- Footwork
- The Rake, Speed Jab, Power Stab, and Edge Thrust
- Elliptical and circular stabbing methods
  - How to cut dead, cut, stop cut, vertical strip & more
  - Angles of attack
  - Defending against attacks on your knife hand
  - Using the edge defensively
  - Empty hand techniques
  - The concept of Mai (judging distance)

Never Unarmed is a thought-provoking show that threaten local crops and livestock in Southern Australia. This video features footage from over thirty days of hunting throughout Australia.

**One Disc:** 1 hr

---

**Death Down Under**

Join Lynn C. Thompson on the hunting adventure of a lifetime! On this journey, you’ll travel into the rugged outback of the Northern Territories in Australia where Lynn put his skills to the test by hunting huge Asian Buffalo. Additionally, Lynn anecdotes property owners and government departments in our Buffalo, Red Deer, Fallow Deer and other pest animals that threaten local crops and livestock in Southern Australia. This video features footage from over thirty days of hunting throughout Australia.

One Disc: 1 hr

---

**Self Defense with the Sjambok**

In addition to its use as a cattle prod and whip, the African Sjambok is an incredibly effective means of self-protection. Several Martial Arts systems throughout the world have explored their own application of the “right whip” and, in the DVD, Lynn Thompson and Guro Ron Balicki will teach a variety of combat training ideas for this fantastic tool.

- Advantages of the Sjambok
- Gripping methods
- Combative styles
- Footwork
- One and two handed striking methods Pommeled / striking
- Push, pull, and pushing
- Defeating disarm attempts Using footwork to avoid blow
- Smashing, choking, and sawing
- Pinching, trapping and picking
- Defeating the charge and the standing grapple
- Defending your weapon hand, stopping, counter striking, parrying, and blocking

Two Discs: Approx. 4-1/4 hrs.

---

**Stun, Stagger and Stop**

This DVD set covers Martial Arts concepts, training and combative applications of the Walking Stick or heavy stick. Cold Steel President Lynn C. Thompson and Guro Ron Balicki present:

- How to Choose a Machete, sharpen it, and customize it
- How to grip the Machete, carry it and conceal it
- What is the Sjambok? Sjambok features a sharp edge, modified blade, and is equipped with a soft comfortable Kayo handle that’s designed to resemble a flintlock branded bullet. Since the Sjambok is a multidimensional from super tough polymers, it’s incredibly durable and able to withstand weather conditions which would cause a traditional leather or whip to break, crack or mildew.

---

**The Fighting Machete**

In this instructional DVD series, Cold Steel President Lynn C. Thompson and Guro Ron Balicki explore the Martial Arts application and combative potential of the Sjambok – an agricultural tool found all over the world and a weapon throughout the Five Major Martial Arts.

**Features:**
- Avoidance Tactics Utilizing Footwork and Avoidance Patterns
- Fighting from the Standing Grapple (Clinch)
- Defensive Tactics Utilizing Footwork and Avoidance Patterns
- Hitting, Smashing, and Hammering Utilizing the Flat of the Blade
- Footwork - Over 26 Footwork Techniques are taught! 7 Methods of Employing the Point - Including Reverse Grip Methods
- 13 Methods of Employing the Sjambok’s Edge
- 3 Methods of Employing the Sjambok’s Edge the Machete
- Smashing, Hammering and BB Blasting the Guide to the Blade and Spine of the Sjambok
- Defensive Tactics Utilizing Footwork and Avoidance Patterns
- Ways to Use the Sjambok to Black in Fynn bombing Attacks
- Defeating Disarm Attempts
- Defeating the Charge and Taking Down Attempts
- Fighting from the Standing Grapple (Clinch)
- How to Create and Identify an Opening in an Opponent’s Defense
- And much more!

Three Discs: Approx. 9 hrs.

---

In this unique hunting experience Down Under, Lynn C. Thompson voyages to Australia, Buffalo and wild boar with his trusty Ruger Super Blackhawk and Super Redhawk revolvers.

Approx. 105 Min.

---

**Never Unarmed**

FIlmed over 2 1/2 years, “Never Unarmed” DVD set features Lynn C. Thompson with the gloves off as he discusses the pros and cons of a multitude of firearms.

Never Unarmed is a thought provoking show and tells it as is. Never Unarmed talks about the concepts, theories and training insights featured in a lifetime of study and exploration throughout the “prepper” community. Never Unarmed is a thought-provoking show that tells it as is. Never Unarmed is a thought-provoking show that tells it as is. Never Unarmed is a thought-provoking show that tells it as is.
Imagine an extremely accurate, highly effective broadhead for about a dollar! That’s right! The stopping power and performance you need for even less than the price of a cup of coffee! 100% made in the USA, with multiple patents pending, the Cheap Shot™ ushers in a new era of bow and crossbow hunting potential. It’s the world’s first polymer broadhead! Made from a space-age polymer developed specifically as a substitute for steel, the Cheap Shot™ is tough, sharp and practically impervious to the elements! Unlike a steel broadhead, it will never rust, tarnish or corrode, and it will endure all but the most extreme weather conditions. Available in two sizes, each Cheap Shot™ is outfitted with Cold Steel™’s signature “grip n’ rip” style serrations - developed for use on military tactical knives - specially designed to cut tough fibrous tissue, and capable of making short work of any mere flesh and blood target, dispatching even big game quickly and humanely. Easy to use and quick to replace, every Cheap Shot™ is accurate, lethal and dirt cheap! “I didn’t grow up with a silver spoon in my mouth, and every dollar I have I’ve earned the hard way. Sure, I often use expensive broadheads when I’m hunting, but it still hurts when I miss, damage them, or lose my arrow! That’s why I invented the Cheap Shot. You can take your best shot every time you draw your bow without worrying about breaking the bank!” – Lynn C. Thompson, President, Cold Steel®
